

## 24 - neue Programme mit YaST installieren / desinstallieren

### ***Installing/Uninstalling Software***

#### **Yast and the packages**

- All CDs have the same list of packages
- Press F2 to get file list and their install location and more info
- F10 and NOT <ESC> to get out of a window
- Notice the free space left on directories while installing
- Install from directory is also possible

#### **From compressed files**

- Tar method
- *mc* view of `.tar.gz` files

#### **RPM Command for info and installation of a software package**

- `rpm -qi packagename`

#### **Location of installation of programs**

- For KDE
- For regular programs from SuSE CDs (F2 in yast)

#### **Files involved:**

- `yast`
- `rpm`
- `tar`
- `zip`, `unzip`, `gzip`, `unzip` and `gunzip`
