If you're storing anything in databases that you do not want to lose, chances are you should be doing weekly or even daily backups. Depending on what you are using your databases for, be it to store forum messages, employee information, or your spending information, you are going to need to choose a backup that meets your needs.

### Mysql **Database Backup**

If you want to take your Mysql Database Backup follow this link

http://www.debianhelp.co.uk/mysqlscript.htm
