

# DbEncrypt

database encryption solution

---

For Microsoft SQL Server

APPLICATION  
SECURITY, INC.

[www.AppSecInc.com](http://www.AppSecInc.com)

# Agenda

---

- **There is a problem...**
  - Main Problem
  - Existing Solution Shortcomings
  - More Granular Industry Problems
- **There is a solution...**
  - ASI's DbEncrypt
  - Who Benefits? How? Why?
  - Key Technology Differentiation
- **There is a way... and a plan...**
  - What's included?
  - Our Organization, Current Position and Future Plans

**APPLICATION  
SECURITY, INC.**

[www.AppSecInc.com](http://www.AppSecInc.com)

# Main Problem

---

- The prevention of unwanted users or personnel from viewing data (“data-at-rest”)
  - Outside Intrusions
  - Internal Personnel
  - Administrative Personnel
    - Database Administrators
    - System Administrators
    - General Administrators

APPLICATION  
SECURITY, INC.

[www.AppSecInc.com](http://www.AppSecInc.com)

# Existing Data Security Solutions

- Security and Data Protection Solutions
  - Existing security solutions do not address this “main problem”
    - Vulnerability Assessment, IDS, Firewalls, Single Sign-On
  - Backup Solutions
    - Provides protection for “off-line” data
- Existing Encryption Solutions
  - Existing Data Encryption (“data-in-transit”)
    - SSL, PKI, etc.

APPLICATION  
SECURITY, INC.

[www.AppSecInc.com](http://www.AppSecInc.com)

# Database Security in General

---

- Non-existent controls and mechanisms
  - Nothing preventing unwanted personnel or even the DBA from seeing data
- Traditional Database Security Concepts Do Not Apply in Today's World
  - Access Control and Permissions

APPLICATION  
SECURITY, INC.

[www.AppSecInc.com](http://www.AppSecInc.com)

# Granular Industry Problems

---

- **Service Provider & E-Business** in General (ASPs, ISPs, MSPs, and Internal / External Systems)
  - Providing the data security guarantee
  - Overcoming customer and partner fears
  - Establishing accountability for data security

**APPLICATION  
SECURITY, INC.**

[www.AppSecInc.com](http://www.AppSecInc.com)

# Granular Industry Problems

- Regulatory Requirements
  - VISA CISP
    - Requirement #3: Encrypt Stored Data
      - Minimum account information to be encrypted is the Visa account number and expiration date
  - Gramm-Leach-Bliley Act
    - Interagency Guidelines (Manage & Control Risks)
      - Encryption of electronic customer information in transit or in storage
    - TITLE V – PRIVACY
      - Subtitle A – SEC. 501 PROTECTION OF NONPUBLIC PERSONAL INFORMATION

APPLICATION  
SECURITY, INC.

[www.AppSecInc.com](http://www.AppSecInc.com)

# DbEncrypt™ is the Answer

- **Main Problem:**
  - The prevention of unwanted users or personnel from viewing data (“data-at-rest”)
- **Answer:**
  - A flexible infrastructure designed to encrypt column and row-level data stored in the tables of a database.

APPLICATION  
SECURITY, INC.

[www.AppSecInc.com](http://www.AppSecInc.com)

# DbEncrypt™ Key Features

---

- Database Column and Row-Level Encryption
- Access to world-class security resources that facilitate effective data protection
- Controls and mechanisms providing authentication, encryption, and data integrity

APPLICATION  
SECURITY, INC.

[www.AppSecInc.com](http://www.AppSecInc.com)

# DbEncrypt™ Key Features

- Database Column and Row-Level Encryption

# DbEncrypt™ Key Features

- Access to world-class security resources that facilitate effective data protection
- Encryption Algorithms - complete list at:
  - <http://www.appsecinc.com/products/dbencrypt/mssql/algorithms.html>
  - 25 of the strongest and most widely analyzed algorithms
    - AES
    - RSA
    - DES
    - RC4
    - MD5
    - SHA-1
    - Blowfish
    - Twofish

**APPLICATION  
SECURITY, INC.**

# DbEncrypt™ Key Features

- Controls and mechanisms providing authentication, encryption, and data integrity

Key Management System Encryption API Examples

Encrypted Columns

Users

Encrypt Column

DbEncrypt Privileges

Administrator

Grant copy of keys to other users

Delete other user's copies of keys

Create private/public keys for users

Encrypt column

Remove encryption from column

Reset column key

Key Management System Encryption API Examples

Encrypted Columns

# Flexible for All User Levels

- DbEncrypt™ can be utilized as a:
  - **Turnkey solution** to automatically and transparently encrypt data in columns and rows

**OR**

- As a **low-level API** providing cryptographic algorithms for SQL developers

APPLICATION  
SECURITY, INC.

[www.AppSecInc.com](http://www.AppSecInc.com)

# Turnkey Transparent Solution...

- **Who benefits?:**

Database Administrators (DBAs) and Developers that **do not want to bother with the details** – transparent encryption functionality

- **How do they benefit?:**

Point-and-click on columns and tables to...

- Encrypt Data
- Create triggers and views to transparently encrypt/decrypt data
- Manage the encryption keys

APPLICATION  
SECURITY, INC.

[www.AppSecInc.com](http://www.AppSecInc.com)

# Low-Level API...

- **Who benefits?:**

Database Administrators and Developers that wish to **build their own encryption systems** utilizing the API features

- **How do they benefit?:**

- SQL Programmers to use encryption as they see fit
- Provides developers with the ability to write proprietary encryption systems while still harnessing the power and capabilities of DbEncrypt™

APPLICATION  
SECURITY, INC.

# Availability and Price

- Evaluation Copies Available for Download:
  - <http://www.appsecinc.com/downloads/>
- Price:
  - \$9995 per instance with volume discounts
  - Additional 20% for Maintenance, Upgrades, and Technical Support (**MASTER Subscription Program**)
- Updates are easily downloadable from:
  - <http://www.appsecinc.com/downloads/>

APPLICATION  
SECURITY, INC.

# Who is Application Security, Inc.

---

- Unique Position and Background
  - SHATTER focuses research on producing the following security solutions for database, groupware, web, and ERP applications:
    - Database Encryption
    - Penetration Testing/Vulnerability Assessment
    - Intrusion Detection

**APPLICATION  
SECURITY, INC.**

[www.AppSecInc.com](http://www.AppSecInc.com)

# Application Security, Inc. Family Suite

- **Database Encryption**
  - DbEncrypt for Oracle
  - DbEncrypt for Microsoft SQL Server
- **Application Pen Test / Vulnerability Assessment**
  - AppDetective for Oracle
  - AppDetective for Microsoft SQL Server
  - AppDetective for Sybase
  - AppDetective for Lotus Notes/Domino
  - Versions coming soon for Oracle Application Server, IBM DB2, MySQL, and Exchange
- **Intrusion Detection (Coming Soon)**
  - AppRadar

**APPLICATION  
SECURITY, INC.**

[www.AppSecInc.com](http://www.AppSecInc.com)

# Wrapping Up...

- **The problem...**
  - Main Problem
  - Existing Solution Shortcomings
  - More Granular Industry Problems
- **The solution...**
  - ASI's DbEncrypt
  - Who Benefits? How? Why?
  - Key Technology Differentiation
- **The way... and the plan...**
  - What's included?
  - Our Organization, Current Position and Future Plans
