

- **To update the Kde Menu to the last saved `kdemenuedit` content:**
 - After login from kdm KDE menu system takes the general menu settings and make modifications(adding, moving, erasing items) to it by following the instructions(xml) located in `~/.config/menus` file.
 - The desktop items used for that are located in `~/.local/share`.
 - If after changes has been made in the Kmenueditor they don't show in the menu run:
`kbuildsycoca --noincremental`To add more programs to the general menu run:
`kappfinder`

-
- **To Change the Splash Picture of KDE.**
Get a new directory of a theme and copy it in:
`/opt/kde3/share/apps/ksplash/Themes`
-
