QUESTION NO: 1

Which two describe `/dev/rmt0`? (Choose two)

- A. The first instance of a tape drive.
- B. The physical device name for the default tape drive.
- C. The logical device name with hardware compression activated.
- D. The default tape device name as indicated in the `/kernel/drv/st.conf` file.
- E. The default tape device name that indicates the tape should not be rewound when the current operation completes.

Answer: A, D

QUESTION NO: 2

You have only a limited number of tapes available, and need to use them to hold as much data as possible.

Which tape device allows you to save the most data on a single tape?

- A. `/dev/rmt/oz`
- B. `/dev/rmt/01`
- C. `/dev/rmt0m`
- D. `/dev/rmt/0h`

Answer: D

QUESTION NO: 3

What is a valid `/etc/vfstab` entry for associating the `/export` directory with the device `c2t3d0s0`?

- A. `/dev/dsk/c2t3d0s0 /dev/rdisk/c2t3d0s0 /export ufs 1 yes`
- B. `/dev/rdisk/c2t3d0s0 /dev/rdisk/c2t3d0s0 /export ufs 1 yes -`
- C. `/dev/dsk/c2t3d0s0 /dev/rdisk/c2t3d0s0 /export ufs 1 yes -`
- D. `/devices/dsk/c2t3d0s0 /devices/rdisk/c2t3d0s0 /export ufs 1 yes -`

Answer: C

Fast Way to get your Certification

QUESTION NO: 4

With the system powered off, you physically connect a new SCSI disk into the existing SCSI chain. You boot the system using the `boot -r` command.

In which four locations can you find the new device names for the new SCSI disk?
(Choose four)

- A. /devices
- B. /dev/dsk
- C. /dev/rdisk
- D. /kernel/drv
- E. /etc/path_to_inst
- F. /etc/name_to_major
- G. /platform/sun4u/kernel/drv

Answer: A, B, C, F

QUESTION NO: 5

Which command can you use to display jobs that are scheduled to run at a specific time?

- A. atq
- B. jobq
- C. jobs
- D. queued

Answer: A

QUESTION NO: 6

You have four printers installed and configured on your print server. The printers are named according to their performance: **veryfast**, **fast**, **medium**, and **slow**. You want to define a print class, **printclass**, that incorporates all four printers and sends most of the work to the **veryfast** and **fast** printers.

Which sequence of commands on the print server accomplishes this task?

- A. `lpadmin -p veryfast,fast,medium,slow -c printclass`
- B. `lpsched -p veryfast,fast,medium,slow -c printclass`
- C. `lpadmin -p slow -c printclass`
`lpadmin -p medium -c printclass`
`lpadmin -p fast -c printclass`
`lpadmin -p veryfast -c printclass`

Fast Way to get your Certification

```
D. lpadmin -p veryfast -c printclass  
lpadmin -p fast -c printclass  
lpadmin -p medium -c printclass  
lpadmin -p slow -c printclass
```

Answer: D

QUESTION NO: 7

What files does the `last` command read to determine login history?

- A. `/var/adm/wtmp`
- B. `/var/adm/utmpx`
- C. `/var/adm/wtmpx`
- D. `/var/adm/lastlog`

Answer: C

QUESTION NO: 8

You `telnet` into a Solaris machine and log in as `user1`. Your account is set up to use the C shell (`csch`) and your home directory is `/home/user1`.

Which three files (assuming they exist) does the C shell read to initialize your environment? (Choose three)

- A. `/etc/login`
- B. `/etc/.login`
- C. `/etc/profile`
- D. `/home/user1/.login`
- E. `/home/user1/.cshrc`
- F. `/home/user1/.profile`

Answer: B, C, E

QUESTION NO: 9

A patch can be installed with no backout information saved to economize on disk usage. Which is the correct command to install the patch 105050-05 with “no backout” from `/tmp`?

- A. `patch < /tmp/105050-05`

Fast Way to get your Certification

- B. `patchadd /tmp/105050-05`
- C. `pkgadd -d /tmp/105050-05`
- D. `patchadd -d /tmp/105050-05`

Answer: D

QUESTION NO: 10

The SUNWman package has been spooled into the `/export/host1/packages` directory. Your current directory is `/etc`. You want to obtain detailed information about this package before installing it into the Solaris Operating Environment on your system.

Which command displays the information you want to see?

- A. `pkginfo -dl . SUNWman`
- B. `pkginfo -dl /export/host1/packages SUNWman`
- C. `pkginfo -d /export/host1/packages -l SUNWman`
- D. `pkginfo -d SUNWman /export/hist1/packages -l`

Answer: C

QUESTION NO: 11

You have shut down your system to run level 0, and you are at the `ok` prompt. You want to display a list of disk device paths and choose one to use it a customized device alias.

Which OBP command allows you to select a device path and later insert it into the command line that creates the new device alias?

- A. `devalias`
- B. `show-devs`
- C. `show-disks`
- D. `find-device`

Answer: C

QUESTION NO: 12

You have logged into the console as `user1`. Now you log in as `root` using the `su` command.

Fast Way to get your Certification

Which user identities do the `whoami` and `who am i` commands report?

- A. `whoami` reports `root`, `who am i` reports `root`.
- B. `whoami` reports `user1`, `who am i` reports `root`.
- C. `whoami` reports `root`, `who am i` reports `user1`.
- D. `whoami` reports `user1`, `who am i` reports `user1`.

Answer: C

QUESTION NO: 13

Your `telnet` into a Solaris machine and log in as `user1`. Your account is set up to use the Korn shell (`ksh`) and your home directory is `/home/user1`.

The following files are read by the Korn shell to initialize your environment on login:

- A. `/home/user1/.kshrc`
- B. `/etc/profile`
- C. `/home/user1/.profile`

In which order are they executed?

- A. A, B, C
- B. A, C, B
- C. B, A, C
- D. B, C, A
- E. C, A, B
- F. C, B, A

Answer: D

QUESTION NO: 14

An `fsck` has just been run on an unmounted file system that exists on `/dev/rdisk/c0t3d0s7`.

Which command can you use to mount this file system as `/export/eng_data`?

- A. `mount /dev/dsk/c0t3d0s7 /export/eng_data`
- B. `mount /export/eng_data /dev/dsk/c0t3d0s7`
- C. `mount /dev/rdisk/c0t3d0s7 /export/eng_data`
- D. `mount /export/eng_data /dev/rdisk/c0t3d0s7`

Fast Way to get your Certification

Answer: A

QUESTION NO: 15

Which command displays the list of alternate superblocks for a UFS file system on c0t0d0s0?

- A. `fsck /dev/rdisk/c0t0d0s0`
- B. `format /dev/dsk/c0t0d0s0`
- C. `prtvtoc /dev/dsk/c0t0d0s0`
- D. `newfs -N /dev/rdisk/c0t0d0s0`

Answer: D

QUESTION NO: 16

Which two are reasons to select Custom JumpStart installation over Web Start Flash installation? (Choose two)

- A. JumpStart uses a master system to serve the installations.
- B. JumpStart installation is faster than a Web Start Flash installation.
- C. JumpStart uses profiles that can be customized for different types of systems.
- D. JumpStart allows you to incorporate scripts to perform pre-installation and post-installation tasks.

Answer: C, D

QUESTION NO: 17

You have 1 of 2 Solaris 9 installation CD-ROMs, and you want to spool the SUNWzip package from the /cdrom/sol_9_sparc_2/Solaris_9/Product directory to the default spooling directory?

Which two commands can accomplish this? (Choose two)

- A. `pkgadd -s spool -d /cdrom/sol_9_sparc_2/Solaris9/Product SUNWzip`
- B. `pkgadd -d spool -s /cdrom/sol_9_sparc_2/Solaris_9/Product SUNWzip`
- C. `pkgadd -d /cdrom/sol_9_sparc_2/Solaris_9/Product SUNWzip -s /var/spool/pkg`
- D. `pkgadd -s /var/spool/pkg -d /cdrom/sol_9_sparc_2/Solaris_9/Product SUNWzip`

Fast Way to get your Certification

Answer: A, D

QUESTION NO: 18

You successfully installed the recommended patch cluster for the Solaris release installed on your system. A specific hardware component you want to attach requires a patch that is not found in the patch cluster.

What should you do to check if the new patch is incompatible with any of those patches already installed?

- A. Install the patch and see if it works.
- B. Read the README file associated with the new patch.
- C. Read the README file associated with the patch cluster.
- D. No action is required because all patches are compatible.

Answer: B

QUESTION NO: 19

The main tasks for configuring printer services are setting up the printer, setting up the print server, setting up the print client, and verifying printer access.

Place each task on its definition.

Task - Select from these	Definition - place here
Set up a printer	Configure the system that will manage the printer.
Set up print server	Check that the print server recognizes each client.
Set up print client	Physically connect the printer to a machine of the network.
Verify printer access	Configure the system to access a remote printer.

Fast Way to get your Certification

Answer:

Task - Select from these

Definition - place here

Set up a printer

Verify printer access

Set up print server

Set up print client

QUESTION NO: 20

Which two are correct statements about printer classes? (Choose two)

- A. A printer class can NOT include printers from different manufactures.
- B. A printer class must be defined before any printers can be added to it.
- C. A printer class is a way of grouping individual printers for load balancing.
- D. Printer priority within a class can be defined by adding the printers to the class in descending order priority.

Answer: C, D

QUESTION NO: 21

On may 11, at 9:30 A.M., an administrator accidentally removes several critical files from /etc. Analysis of the /etc/dumpdates file reveals the following:

```
/dev/rdisk/c0t0d0s0 0 Fri May 10 10:15:38 2002
/dev/rdisk/c0t0d0s5 0 Fri May 10 10:46:06 2002
/dev/rdisk/c0t0d0s7 0 Fri May 10 10:54:56 2002
/dev/rdisk/c0t0d0s7 0 Fri May 10 10:59:02 2002
/dev/rdisk/c0t0d0s0 2 Sat May 11 10:15:03 2002
/dev/rdisk/c0t0d0s7 2 Sat May 11 10:25:23 2002
/dev/rdisk/c0t0d0s0 3 Sun May 12 10:15:14 2002
/dev/rdisk/c0t0d0s7 3 Sun May 12 10:22:22 2002
```

Fast Way to get your Certification

A portion of the `/etc/vfstab` file shows:

```
/dev/dsk/c0t0d0s0 /  
/dev/dsk/c0t0d0s5 /opt  
/dev/dsk/c0t0d0s6 /usr  
/dev/dsk/c0t0d0s7 /export/home
```

Which `/etc/dumpdates` entry identifies the tape from which you should obtain the deleted files?

- A. `/dev/rdisk/c0t0d0s0 3 Sun May 12 10:15:14 2002`
- B. `/dev/rdisk/c0t0d0s0 0 Fri May 10 10:15:38 2002`
- C. `/dev/rdisk/c0t0d0s6 0 Fri May 10 10:54:56 2002`
- D. `/dev/rdisk/c0t0d0s5 0 Fri May 10 10:46:06 2002`

Answer: B

QUESTION NO: 22

You are not allowed to bring the system down to single user mode, but you must back the active `/ (root)` file system.

What can you use to back up your `/ (root)` file system?

- A. UFS Snapshot
- B. Solaris Volume Manager
- C. The `devfsadm` command
- D. Solaris Management Console

Answer: E

QUESTION NO:23

You use the `ufsrestore` command to extract the whole content of a file system (stored to tape with `ufsdump`) onto another file system.

Which statement about inode allocation is true?

- A. The new file systems inodes are allocated successively as the files are restored, independent of the inode numbers recorded to tape.
- B. `ufsrestore` consults the inode map in each cylinder.
If an inode to be restored is already allocated, `ufsrestore` quits with a fail message.

Fast Way to get your Certification

- C. The inodes are allocated such that the inode numbers after the restore are identical to the inode numbers recorded on tape, effectively overwriting inodes that had been allocated before the restore.
- D. `ufsrestore` tries to allocate inode numbers for the restored files as they are recorded on tape and evades to new, unallocated inodes whenever an inode number is already allocated in the file system.

Answer: C

QUESTION NO: 24

Which three commands stop the NFS server daemons? (Choose three)

- A. `/etc/init.d/nfs.server stop`
- B. `/etc/rc5.d/K28nfs.server stop`
- C. `/etc/rc2.d/K28nfs.server stop`
- D. `/etc/rc0.d/S15nfs.server stop`
- E. `/etc/rc3.d/S15nfs.server.stop`
- F. `/etc/rc0.d/K28nfs.server stop`

Answer: A, C, E

QUESTION NO: 25

You have a system with a default configuration and a valid entry in the NFS server configuration file. What is the run level in which the NFS server daemons start automatically?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 5
- F. S

Answer: D

QUESTION NO: 26

You have been requested to restore some files to the home directory of `/export/home/usera` by using the `tar` command. You `cd` the home directory of `usera` before doing the restore.

Fast Way to get your Certification

What happens?

- A. If a file you want to restore existed, it would not be restored.
- B. An existing file is renamed to `filename.old` and a new file is restored,
- C. If a file you want to restore already existed, it would be overwritten by the restored file.
- D. If a file you want to restore already existed, only the modification time would be updated.

Answer: C

QUESTION NO: 27

Exhibit:

1. `extract`
2. `add hosts`
3. `cd /var/tmp`
4. `cd /etc/inet`
5. `mt -f /dev/rmt/On fsf 1`
6. `ufsrestore ivf /dev/rmt/0`
7. `mv /var/tmp/etc/inet/hosts /etc/inet/hosts`
8. `quit`

The steps that should be used to interactively restore the `/etc/inet/hosts` file from the second `ufsdump` file on a tape are shown in the exhibit.

In which order should they be executed?

- A. 3, 6, 4, 2, 1, 5, 7, 8
- B. 3, 4, 5, 6, 2, 1, 7, 8
- C. 3, 6, 5, 2, 1, 4, 8, 7
- D. 3, 5, 6, 4, 2, 1, 8, 7

Answer: D

QUESTION NO: 28

You want to create a hard link to a regular file. What is required of the regular file for the `ln` command to succeed? (Choose two)

- A. The file must exist before you run the `ln` command.
- B. The file must be in the same directory as the new file name.
- C. The file must be in the same file system as the new file name.

Fast Way to get your Certification

- D. The file must be in a different directory from the new file name.
- E. The file must be in a different file system from the new file name.

Answer: A, C

QUESTION NO: 29

You use the command `lp file1` to print `file1`. Which source does the `lp` command check first to determine where to send print jobs?

- A. The `LPDEST` environment variable.
- B. The `PRINTER` environment variable.
- C. The printer defined as the default in the `$HOME/.printers` file.
- D. The printer defined as the default in the `/etc/printers.conf` file.

Answer: A

QUESTION NO: 30

Which command prints three copies of a file named `myfile` on the default printer?

- A. `lp -3 myfile`
- B. `lp -c 3 myfile`
- C. `lp -n 3 myfile`
- D. `lp -0 3 myfile`

Answer: C

QUESTION NO: 31

Which file associates GIDs with group names?

- A. `/etc/groups`
- B. `/etc/groups`
- C. `/etc/system`
- D. `/etc/default/group`

Answer: A

Fast Way to get your Certification

QUESTION NO: 32

Which file should you modify to change the number of groups to which a user can belong?

- A. etc/group
- B. /etc/system
- C. /etc/default/login
- D. /etc/default/passwd

Answer: C

QUESTION NO: 33

Your company has 20 identical systems that are used to conduct training classes. Each week you must re-install the Solaris Operating Environment on all 20 systems and customize them for the class running that week.

Which Solaris installation method should you use for this purpose?

- A. Solaris Web Star installation.
- B. Solaris Interactive installation.
- C. Solaris JumpStart installation.
- D. Solaris Live Upgrade installation.

Answer: C

QUESTION NO: 34

You are using a system running in single user mode and want to turn it off. Which three commands bring the system to a state where you can safely turn off the power? (Choose three)

- A. halt
- B. init 3
- C. init 5
- D. reboot
- E. poweroff
- F. reboot -- -r

Answer: A, C, F

Fast Way to get your Certification

QUESTION NO: 35

You can log in to both `hostA` and `hostb` using the same login name. You want to use the `rcp` command to copy a file from `hostA` to `HostB`.

What do you need to do to allow this operation?

- A. Add your login name to the `/etc/hosts.equiv` file on `hostb`.
- B. Create `hosts.equiv` files in your home directories and put a `+` in the file on `hostb`.
- C. Ask the system administrator to add you to the `/etc/.rhosts` file on the host `hostb`.
- D. Create a `.rhosts` file in your home directory on `hostb` and put the host name `hostA` in the file.

Answer: B

QUESTION NO: 36

You `telnet` into a Solaris machine and log in as `user1`. Your account is set up to use the Bourne shell (`sh`) and your home directory is `/home/user1`.

Which two files (assuming they exist) does the Bourne shell read to initialize your environment? (Choose two)

- A. `/etc/login`
- B. `/etc/profile`
- C. `/home/user1/.login`
- D. `/home/user1/.profile`

Answer: B, D

QUESTION NO: 37

Which command adds the user `user1` to the group `staff`?

- A. `chuser -g staff user1`
- B. `usermod -G staff user1`
- C. `moduser -g staff user1`
- D. `groupmod -u user1 staff`

Answer: B

Fast Way to get your Certification

QUESTION NO: 38

Which subcommand within the `format` utility, when executed from the initial menu, allows you to save new disk and slice information to a file?

- A. `disk`
- B. `save`
- C. `label`
- D. `format`
- E. `update`
- F. `partition`

Answer: B

QUESTION NO: 39

Given the command:

```
# pkgrm -s spool SUNWaudd
```

What is the result?

- A. It removes the SUNWaudd package, but saves a copy in a spooling area.
- B. It removes the SUNWaudd package from the `/var/spool/pkg` directory.
- C. It displays spooling information about the SUNWaudd package as it is being removed.
- D. It removes the SUNWaudd package that is currently installed in the Solaris Operating Environment.

Answer: B

QUESTION NO: 40

Which are two reasons for using Web Start Flash installation instead of Solaris Web Start? (Choose two)

- A. Web Start Flash uses a Java technology-based GUI.
- B. Web Start Flash allows interactive customization of the installation.
- C. Web Start Flash installation is much faster because it is based on a previously installed system.
- D. Web Start Flash installation enables you to install many systems based on a configuration installed on a master system.

Fast Way to get your Certification

Answer: C, D

QUESTION NO: 41

You decide to create a class of printers. Which command can create a class of printers called supports?

- A. lpadmin -c support
- B. lpadmin -c "printer name" -p supports
- C. lpadmin -p support -c "printer name"
- D. lpadmin -p "printer name" -c supports

Answer: D

QUESTION NO: 42

You system is configured with a local print spooler called `printer1` and has access to a remote print spooler called `printer2`. Your default printer is `printer1`.

What command should you use to print `file1` to `printer2`?

- A. lp printer2 file2
- B. lp file1 printer2
- C. lp -p printer2 file2
- D. lpr -p printer2 file1

Answer: C

QUESTION NO: 43

Which command can be used to retrieve just the `/etc/inet/hosts` file from the `ufsdump` file on the `/dev/rmt/0` tape device?

- A. ufsrestore ./etc/inet/hosts /dev/rmt/0
- B. ufsrestore Ovf /dev/rmt/0 ./etc/inet/hosts
- C. ufsrestore rvf /dev/rmt/0 ./etc/inet/hosts
- D. ufsrestore svf /dev/rmt/0 ./etc/inet/hosts

Answer: B

Fast Way to get your Certification

QUESTION NO:44

You have defined two device aliases named `bootdisk01` and `bootdisk02`. These aliases allow you to boot your system from two different disks, and currently `bootdisk01` is used by default.

Which Solaris command should you use to cause the system to boot from `bootdisk02` by default?

- A. `eeeprom boot-device=bootdisk02`
- B. `eeeprom boot-device bootdisk02`
- C. `setenv boot-device=bootdisk02`
- D. `setenv boot-device bootdisk02`

Answer: A

QUESTION NO: 45

You have set up a permanent customized device alias at the OBP, Which command allows you to remove the alias?

- A. `unset`
- B. `unalias`
- C. `nvalias`
- D. `devunalias`
- E. `unsetalias`

Answer: C

QUESTION NO: 46

Given:

```
# fssnap -i
    0    /export/home
```

You type the command:

```
# /usr/lib/fs/ufs/fssnap -i /export/home
```

What is the result of this command?

- A. A new `fssnap` image of the `/export/home` file system is created.
- B. Detailed information about the `/export/home` snapshot is displayed.
- C. An existing `fssnap` image of `/export/home` for read only is mounted.

Fast Way to get your Certification

D. The `/export/home` snapshot is used as input to the `fsnap` command.

Answer: B

QUESTION NO: 47

Given:

```
# df -k
Filesystem      kbytes  used  avail capacity  Mounted on
/dev/dsk/c0t0d0s0 192423  75502  97679  44%  /
/dev/dsk/c0t0d0s6 198423  935171  989533  49%  /usr
/proc           0        0        0  0%  /proc
mnttab          0        0        0  0%  /etc/mnttab
fd              0        0        0  0%  /dev/fd
/dev/dsk/c0t0d0s3 192423  45577  127604  27%  /var
swap            674776    48  674728  1%  /var/run
swap            675040    312  674728  1%  /tmp
/dev/dsk/c0t0d0s5 1984230    10  1924694  1%  /export
/dev/dsk/c0t0d0s7 3806230 3767115    1053  99%  /export/home
```

If a level 0 backup of `/export/home` were attempted, it would consume approximately 3.8 GBytes of tape space. What can you use to determine how much tape space would be consumed if a level 3 incremental backup were attempted?

- A. `du -ks /export/home`
- B. `ufsdump 3S /export/home`
- C. `ufsdump 3L /export/home`
- D. `find /export/home -size -level 3 -print`

Answer: B

QUESTION NO: 48

Place each file type on its description.

Fast Way to get your Certification

File type - Select from these

Block device

Character device

Hard link

Symbolic link

File Type Description - place here

Allows a file or directory name to reference another file or directory name anywhere in the logical file tree

Supports read and write operations on a file system.

Transfers data to and from a device as a stream of bytes

Allows two or more names for the same file, but the file names must be located within the same file system

Answer:

File type - Select from these

File Type Description - place here

Symbolic link	nce another file gical file tree
---------------	-------------------------------------

Character device	a file system.
------------------	----------------

Hard link	s a stream of
-----------	---------------

Block device	file, but the file ne file system
--------------	--------------------------------------

QUESTION NO: 49

You have a new printer that requires that you install an initialization file that describes the capabilities of the printer. The file is called `newprinter` and must be placed in the appropriate directory.

In which directory should you place this file?

- A. `/usr/lib/lp/model/n`
- B. `/usr/lib/terminfo/n`
- C. `/etc/lp/interfaces/n`
- D. `/usr/share/lib/terminfo/n`

Answer: D

QUESTION NO: 50

The user `user1` is to be removed from your system. You use the command `userdel -r user1`.

What is the result of this command?

- A. The specified users account is locked.
- B. The specified users account and home directory are deleted.
- C. The specified users account, home directory, and files are deleted.
- D. The specified users account is locked and a list of all files owned by the user is placed in `/var/tmp`.

Answer: B

QUESTION NO: 51

Which three should you use to obtain patches? (Choose three)

- A. World Wide Web access.
- B. CD-ROM media from Sun.
- C. telnet access to SunSolve.
- D. anonymous ftp access to the SunSolve ftp site.
- E. patch supplied from an official periodical publication.

Answer: A, B, C

QUESTION NO: 52

Given lines from the `/etc/inittab` file:

```
ap::sysinit:/sbin/autopush -f /etc/iu.ap
ap::sysinit:/sbin/soconfig -f /etc/sock2path
fs::sysinit:/sbin/rcS sysinit
is:3:initdefault:
p3:s1234:powerfail:/usr/sbin/shutdown -y -i5 -g0
sS:s:wait:/sbin/rcS
s0:0:wait:/sbin/rc0
s1:1:respwan:/sbin/rc1
s2:23:wait:/sbin/rc2
s3:3:wait:/sbin/rc3
s5:5:wait:/sbin/rc5
s6:6:wait:/sbin/rc6
fw:0:wait:/sbin/uadmin 2 0
```

www.correctexams.com

Fast Way to get your Certification

```
of:5:wait:/sbin/uadmin 2 6
rb:6:wait:/sbin/uadmin 2 1
sc:234:respawn:/usr/lib/saf/sac -t 300
```

Which three statements are true? (Choose three)

- A. The default run level is set to 3.
- B. The `/sbin/rcS` script runs at boot time, regardless of the destination run level.
- C. `/sbin/rc2` runs only if the system makes a transition from run level 2 to run level 3.
- D. When the system makes a transition to run level 0, only the `/sbin/rc0` script runs.
- E. When the system boots to run level 3, `/sbin/rc3` does not run until `/sbin/rc2` completes.
- F. The `init` process runs the commands associated with the destination run level, and then exits.

Answer: A, B, D

QUESTION NO: 53

In a default system configuration, when a non-privileged user sets a password, what is the minimum number of characters allowed?

Answer: 6

QUESTION NO: 54

Given the command:

```
useradd -u 102 -g 301 -d /export/home/user1 -s /bin/ksh user1
```

Which three statements are true? (Choose three)

- A. The UID for `user1` is 102.
- B. The login shell for `user1` is the Korn shell.
- C. The user will not be added as no password has been specified.
- D. The command will create a home directory `/export/home/user1`.
- E. The command will not create a home directory `/export/home/user1`.
- F. The command will not work as you have not specified any secondary groups.

Answer: A, B, F

Fast Way to get your Certification

QUESTION NO: 55

Which three are characteristics of the `procfs` file system type? (Choose three)

- A. The process directories are globally readable.
- B. File ownership is determined by the credentials of the process.
- C. It contains reference by file names to the opened files of the process.
- D. It contains a decimal number directory entry corresponding to a process ID.
- E. Each process ID named directory has files that contain more detailed information about the process.

Answer: B, C, E

QUESTION NO: 56

You suspect that the `/usr/bin/ps` binary has been replaced. What command is used to check against the package installation information to check if the file has changed?

- A. `pkgck -l /usr/bin/ps`
- B. `pkgchk -p /usr/bin/ps`
- C. `pkginfo -l /usr/bin/ps`
- D. `pkginfo -p /usr/bin/ps`

Answer: B

QUESTION NO: 57

Basic functions of the Solaris print service include Initialization, Queuing, Tracking, Fault Notification, and Filtering.

Place each function on its definition.

Fast Way to get your Certification

Function - Select from these

Initialization

Queuing

Tracking

Fault Notification

Filtering

Defintion - place here

Converts print jobs to the appropriate type

Manages, view, and cancels print jobs

Ensures that printer is in a known state

Prints an error message if a problem occurs

Schedule print requests

Answer:

Function - Select from these

Defintion - place here

Fault Notification	riate type
Tracking	int jobs
Initialization	wn state
Filtering	em occurs
Queuing	

QUESTION NO: 58

Place each Process Signal number on its Signal Name.

Function - Select from these

Defintion - place here

1
2
9
15

SIGKILL
SIGHUP
SIGTERM
SIGINT

Answer:

Fast Way to get your Certification

Function - Select from these

Defintion - place here

15	SIGKILL
1	SIGHUP
9	SIGTERM
2	SIGINT

QUESTION NO: Q59

You have completed a full `ufsrestore` of the `/(root)` file system.

What is the impact of not removing the `/restoresymtable`?

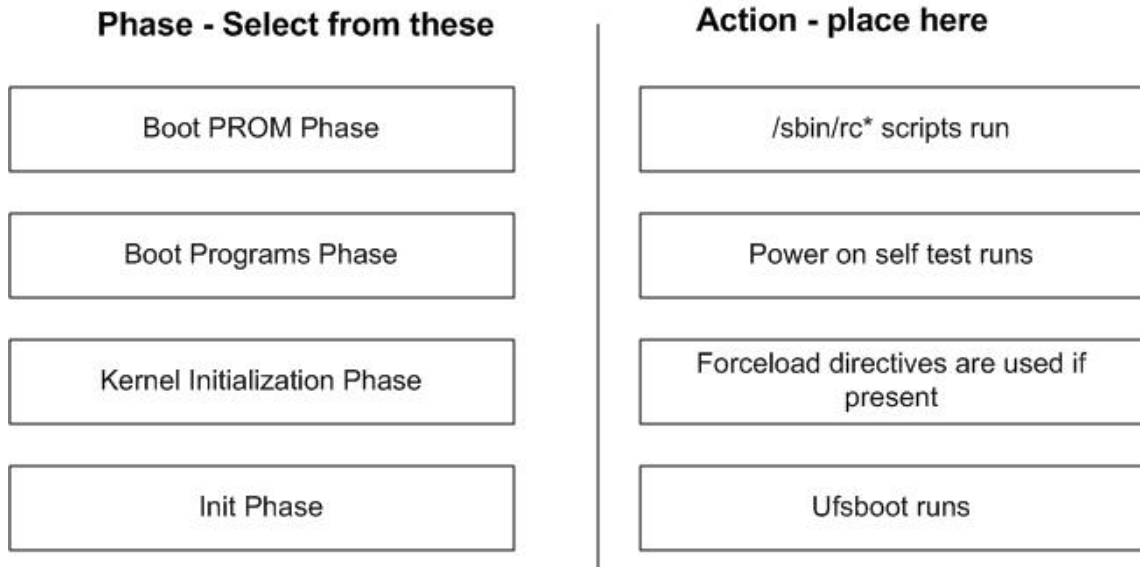

- A. It would slow down directory lookups.
- B. It would take up disk space unnecessarily.
- C. It would corrupt subsequent uses of `ufsrestore`.
- D. There is no impact.
It is linked only to the restore that created it and will automatically be deleted.

Answer: B

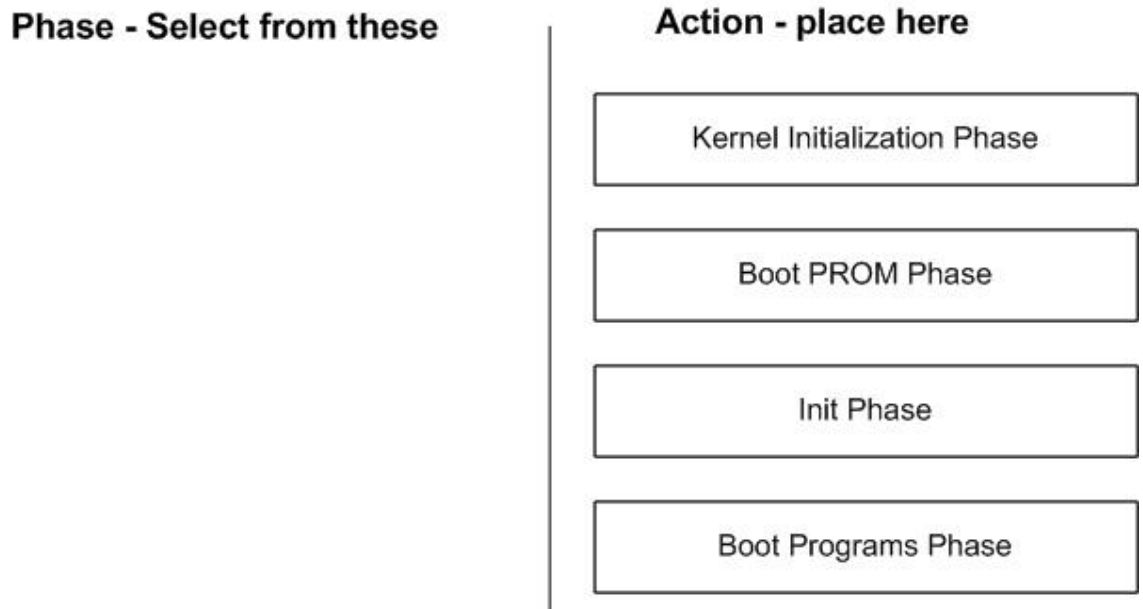

QUESTION NO: 60

Place each system boot or initialization phase on the action that takes place in the phase.

Fast Way to get your Certification

Answer:

QUESTION NO: 61

Which command can be used to restore the `/var/adm` directory and its contents from the `/dev/rmt/0` remote tape device attached to the host `mars`?

- A. `ufsrestore cf /dev/rmt/0 ./var/adm`
- B. `ufrestore ./var/adm mars:/dev/rmt/0`
- C. `ufsrestore vf mars:/dev/rmt/0 ./var/adm`
- D. `ufsrestore xvf mars:/dev/rmt/0 ./var/adm`
- E. `ufsrestore Of rd=mars:/dev/rmt/0 ./var/adm`

Fast Way to get your Certification

Answer: D

QUESTION NO: 62

Which three statements about the `/var/run` file system are true? (Choose three)

- A. It is owned by `root`.
- B. It is the repository for non-system temporary files.
- C. It is not unmounted with the `umount -a` or the `umountall` command.
- D. It is the repository for temporary system files that are not needed across system reboots.
- E. Special commands usable only by `root` to evaluate run levels are stored in `/var/run`.

Answer: A, C, E

QUESTION NO: 63

Which two commands can be used to display a list of active processes that will be updated at a user-defined sample interval? (Choose two)

- A. `prstat`
- B. `prtconf`
- C. `prtdiag`
- D. `psrinfo`
- E. `sdtfpls`
- F. `sdtprocess`

Answer: A, F

QUESTION NO: 64

Given the entry in the `/etc/passwd` file:

```
user1:x:100:101:Sales Manager:/home/user1/./bin/ksh
```

What does the `x` in the second field represent?

- A. This account is locked.
- B. The password for the user is an `x`.
- C. A password is not set for this account.
- D. It is a placeholder for the users encoded password.

Fast Way to get your Certification

Answer: D

QUESTION NO: 65

Given the following actions:

- All local file systems mount.
- Default routers are configured.
- Most of the system daemons start.
- Files in the /tmp directory are removed.
- System accounting is configured.

Which run control script causes these actions to occur?

- A. /sbin/rc1
- B. /sbin/rc2
- C. /sbin/rc3
- D. /sbin/rc5
- E. /sbin/rc6
- F. /sbin/rcS

Answer: B

QUESTION NO: 66

Why should you avoid using the abort sequence to get the ok prompt on a Solaris 9 system?

- A. The CPU (or CPUs) in the system can fail as a result of an abort sequence.
- B. The physical memory installed in the system can be damaged by such an interruption.
- C. The file system can become so corrupted that it may be difficult or impossible to repair.
- D. The CPU could be interrupted while transferring data between two registers, leaving the hardware in an indeterminate state.

Answer: C

QUESTION NO: 67

Fast Way to get your Certification

You are making your system more secure and decide that you are going to disable `root` logins. In the file that contains the entry which controls `root` logins, to what must the line beginning `CONSOLE=` be set for `root` logins to be disabled?

- A. `CONSOLE=`
- B. `CONSOLE=/dev/console`
- C. `CONSOLE=disable_root`
- D. `CONSOLE=root_disable`

Answer: A

QUESTION NO: 68

Each directory listed is a file system mount point in a default installation. Which two file systems contain kernel modules? (Choose two)

- A. `/`
- B. `/tmp`
- C. `/usr`
- D. `/var`
- E. `/export`

Answer: A, C

QUESTION NO: 69

You have been required to write a script that checks daily to see if `at` jobs are scheduled to run. Which two commands could you include in the script to obtain this information? (Choose two)

- A. `atq`
- B. `jobs`
- C. `queued`
- D. `ls -l /var/spool/atjobs`
- E. `ls -l /var/spool/cron/atjobs`

Answer: A, E

QUESTION NO: 70

Fast Way to get your Certification

Your system has no printer configuration in place, but is configured to communicate with all other systems on your network. Which command should you use to send a file called `file1` to a print queue called `printer1` located on a print server called `server1`?

- A. `lp file1 server1:printer1`
- B. `lp -d server1 printer 1 file1`
- C. `lp -d server1:printer1 file1`
- D. `lp file1 -d printer1:server1`

Answer: C

QUESTION NO: 71

Given:

```
# mt -f /dev/rmt/1 status
```

What is the function of the command?

- A. The command is used to report the length of the tape.
- B. The command is used to check the status of the tape device.
- C. The command is used to check the checksum of the files on the tape.
- D. The command is used to check the time stamp on the files on the tape.

Answer: A

QUESTION NO: 72

You want to back up and active / (root) file system without unmounting it. What can you use to create a static image of the / (root) file system to use with a backup command?

- A. The `tar` command.
- B. The `fssnap` command.
- C. The `snapsfs` command.
- D. The `ufsdump -s` command.

Answer: B

QUESTION NO: 73

Fast Way to get your Certification

You want to remove the configuration for `printera` from the system `client1`. You use the command `lpadmin -x printera`.

Which file should you review to check that the settings for `printera` have been removed?

- A. `/etc/printers.conf`
- B. `/etc/default/printer.conf`
- C. `/etc/client1/printer.conf`
- D. `/etc/printers/printera.conf`

Answer: A

QUESTION NO: 74

Given:

```
# chmod 2666 permfile
```

Which three statements about the `permfile` permissions are true? (Choose three)

- A. The sticky bit is set.
- B. The file has the setgid bit set.
- C. The file has the setuid bit set.
- D. The file is not executable by any user.
- E. The associated group has read and write permissions.
- F. The associated group had read, write, and execute permissions.

Answer: C, D, E

QUESTION NO: 75

Given the patch:

```
111021-01 .zip
```

Which command should you use first in a series of steps to install the patch?

- A. `patchadd 111021-01`
- B. `unzip 111021-01.zip`
- C. `zip -U 111021-01.zip`
- D. `uncompress 111021-01.zip`

Fast Way to get your Certification

Answer: B

QUESTION NO: 76

Your current unmask value is 022. You create a regular file.

Which set of permissions are associated with this file?

- A. `rw-r--r-`
- B. `rwxr--r-`
- C. `----w-w-`
- D. `rw-rw-rw-`
- E. `rwxrwxrwx`

Answer: A

QUESTION NO: 77

Given that the volume manager daemon is not running, which command is used to mount an ISO 9660 format CD-ROM onto the mount point `/mnt`?

- A. `mount /dev/cdrom /mnt`
- B. `mount -r /dev/dsk/c0t6d0s0 /mnt`
- C. `mount -F iso -r /dev/dsk/c0t6d0s0 /mnt`
- D. `mount -F hsfs -o ro /dev/dsk/c0t6d0s0 /mnt`
- E. `mount -F hsfs -o ro /mnt /vol/dev/aliases/cdrom0`

Answer: D

QUESTION NO: 78

Given:

```
# lpstat -d
```

What displays on the screen.

- A. The name of the default printer.
- B. The default printers print queue.
- C. A brief description of the default printer.
- D. Detailed status information about the default printer.

Fast Way to get your Certification

Answer: A

QUESTION NO: 79

You need to accomplish a full backup of all files in the /export/home file system to the /dev/rmt/1 remote tape device attached to the workstation mars.

Which command accomplishes this?

- A. ufsdump Of /dev/rmt/1 /export/home
- B. ufsdump Of mars:/dev/rmt/1 /export/home
- C. ufsdump Of /dev/rmt/1 mars:/export/home
- D. ufsdump Omf mars /dev/rmt/1 /export/home
- E. ufsdump Of rd=mars:/dev/rmt/1 /export/home

Answer: D

QUESTION NO: 80

What command reports the systems current run level?

- A. w
- B. rstat
- C. who -r
- D. init -r

Answer: C

QUESTION NO: 81

Given the /etc/dumpdates file entry:

```
/dev/rdisk/c0t0d0s7          0 Fri May 10:23:59:59 2002
/dev/rdisk/c0t0d0s7          2 Fri May 17 23:59:59 2002
/dev/rdisk/c0t0d0s7          5 Fri May 24 23:59:59 2002
/dev/rdisk/c0t0d0s7          9 Fri May 31 23:59:59 2002
```

You want to back up all the files that have been modified or created since May 18.

Which level must you supply to the ufsdump command to achieve this?

- A. level 9
- B. level 2
- C. level 4
- D. level 6

Fast Way to get your Certification

Answer: C

QUESTION NO: 82

Which command logs you in as user1 to the remote system pub_server?

- A. rlogin pub_server -l user1
- B. rlogin pub_server -u user1
- C. login -r pub_server -u user1
- D. rlogin -h pub_server -l user1

Answer: B

QUESTION NO: 83

Which OBP command boots the system and allows use of a different system file?

- A. boot -s
- B. boot -a
- C. boot /etc/system.new
- D. boot -f /etc/system.new

Answer: B

QUESTION NO: 84

You have identified tree files in the /export file system that appear to be identical. You know the inode number used by one of the files.

Which two commands provide information that would verify that these files are hard linked? (Choose two)

- A. cat
- B. ls -lir /export
- C. ls -lar /export
- D. find /export -inum <inode_number>
- E. find /export -inode <inode_number>

Answer: B, D

Fast Way to get your Certification

QUESTION NO: 85

You want to kill the `dtmail` process that is hanging. Which command can you use to achieve this?

- A. `pkill dtmail`
- B. `kill -9 mail`
- C. `pkill -1 mail`
- D. `kill -9 dtmail`

Answer: A

QUESTION NO: 86

Which OBP command creates a temporary customized device alias that disappears after power cycling the machine?

- A. `alias`
- B. `nvalias`
- C. `devalias`
- D. `prtalias`
- E. `setalias`

Answer: D

QUESTION NO: 87

Which two statements about the `partition` submenu within the `format` utility are true? (Choose two)

- A. It allows you to create and modify slices.
- B. It allows you to save the label to a disk file.
- C. It allows disk slices to be divided into soft partitions.
- D. It causes a new superblock to be written to the disk.
- E. It allows you to name a partition table for subsequent retrieval.

Answer: A, E

QUESTION NO: 88

Which command adds the group `class` with a GID of 312?

www.correctexams.com

Fast Way to get your Certification

- A. `newgrp -g 312 class`
- B. `groupadd -g 312 class`
- C. `groupadd -n class:312`
- D. `addgroup -g 312 -n class`

Answer: B

QUESTION NO: 89

The Solaris 9 SPARC platform has five cluster configuration software groups to choose from during installation.

Which cluster configuration contains drivers that Sun ships for third-party hardware?

- A. Core Solaris Software Group.
- B. Entire Solaris Software Group.
- C. End-User Solaris Software Group.
- D. Developer Solaris Software Group.
- E. Entire Solaris Software Group Plus OEM.

Answer: E

QUESTION NO: 90

Which two statements about the `/etc/default/passwd` file are true? (Choose two)

- A. The maximum length of a password is set in `/etc/default/passwd`.
- B. `/etc/default/passwd` contains default passwords for new accounts.
- C. The default password aging parameters are stored in `/etc/default/passwd`.
- D. `/etc/default/passwd` can be used to configure a minimum password length from six to eight characters.

Answer: C, D

QUESTION NO: 91

Place each configuration cluster name on its definition.

Fast Way to get your Certification

Configuration Cluster Select from these

SUNWCXall
SUNWCall
SUNWCprog
SUNWCuser
SUNWCreq

Definition - place here

Core
EndUser
Entire Distribution
Entire Distribution with OEM Support
Developer

Answer:

Configuration Cluster Select from these

SUNWCuser
SUNWCreq
SUNWCall
SUNWCXall
Developer

Fast Way to get your Certification

QUESTION NO: 92

You are ready to decommission the printer `oldtimer` as the printer `newkid` has made it obsolete. What is the sequence of commands to decommission `oldtimer` without losing any print requests?

- A. `reject oldtimer`
`disable oldtimer`
- B. `reject oldtimer`
`lpmove oldtimer newkid`
`lpadmin -x old timer`
- C. `lpshut`
`mw /var/spool/lp/tmp/oldtimer/*`
`/var/spool/lp/tmp/newkid`
`lpadmin -x oldtimer`
`lpsched`
- D. `reject oldtimer`
`mw /var/spool/lp/requests/oldtimer/*`
`/var/spool/lp/requests/newkid`
`enable newkid`
`disable oldtimer`

Answer: B

QUESTION NO: 93

You want to see the Power On Self Test (POST) information as a Solaris 9 machine boots up. What should you do?

- A. Bring the machine to the `ok` prompt, then type the `boot -a` command.
- B. Bring the machine to the `ok` prompt, then type the `reset-all` command.
- C. Attach a terminal device to serial port A with a null modem cable and turn the machine on.
- D. With a graphic console and keyboard attached, turn the machine on, then press the `Ctrl-Alt-Backspace` key.

Answer: C

QUESTION NO: 94

Given that the volume manager daemon is not running, which command is used to mount a DOS format floppy disk onto the mount point `/mnt`?

- A. `mount /dev/fd /mnt`
- B. `mount -d /dev/diskette /mnt`

Fast Way to get your Certification

- C. `mount -F dos /dev/diskette /mnt`
- D. `mount -F pcfs /dev/diskette /mnt`
- E. `mount -F pcfs /mnt /vol/dev/aliases/floppy0`

Answer: D

QUESTION NO: 95

Given the following message from the command which removes the SUNWaudd package:

```
## Verifying package dependencies.  
WARNING:  
    The <SUNWauddx> package depends on the package  
    currently being removed.  
WARNING:  
    The <SUNWusb> package depends on the package currently  
    being removed.  
Dependency checking failed.
```

What happens to the files associated with the SUNWauddx and SUNWusb packages if you continue with the removal operation?

- A. The files are removed.
- B. The files remain on the system.
- C. Only the files shared with the SUNWaudd package are removed.
- D. The files are marked for removal, but are only removed after the next reboot.

Answer: 16

QUESTION NO: 96

Given:

```
/devices/pci@1f,0/pci@1,1/ide@3/dad@0,0:a,raw
```

What kind of device name does this represent?

- A. An instance name.
- B. A block device name.
- C. A logical device name.
- D. A physical device name.
- E. A Berkeley Software Distribution (BSD) device name.

Fast Way to get your Certification

Answer: D

QUESTION NO: 97

You system performs a nightly backup of all the data in the `/sales_data` file system using `ufsdump` to an 8mm DAT tape. Recently, the backup stopped working because all the data no longer fits on a tape. The backup suspends while prompting for another tape volume.

Which strategy allows each nightly backup to fit on one tape?

- A. Taking a level one backup weekly and a level zero backup nightly.
- B. Taking a level zero backup each month, a level two backup each week, and a level 5 backup nightly.
- C. Taking a level 5 backup each month, a level six backup each week, and a level zero backup each night.
- D. Taking the full tape out in the morning, turning the tape over, replacing it in the drive, and allowing the backup to complete.

Answer: B

QUESTION NO: 98

Place the steps necessary to install a local printer on your machine in the correct order.

Steps to Install a Local Printer	Order of Steps
Test the printer	Step 1
Activate and enable the printer	Step 2
Physically attach the printer	Step 3
Add the printer to the print service	Step 4

Fast Way to get your Certification

Answer:

Steps to Install a Local Printer

Order of Steps

Physically attach the printer

Add the printer to the print service

Activate and enable the printer

Test the printer

QUESTION NO: 99

You want to create a permanent device alias called `bootdisk2` for the path:
`/pci@1f,0/pci@1,1/ide@3/disk@2,0`.

Which command should you use to accomplish this?

- A. `alias bootdisk2 /pci@1f,0/pci@1,1/ide@3/disk@2,0`
- B. `nvalias bootdisk2 /pci@1f,0/pci@1,1/ide@3/disk@2,0`
- C. `devalias bootdisk2 /pci@1f,0/pci@1,1/ide@3/disk@2,0`
- D. `prtalias bootdisk2 /pci@1f,0/pci@1,1/ide@3/disk@2,0`
- E. `setalias bootdisk2 /pci@if,0/pci@1,1/ide@3/disk@2,0`

Answer: B

QUESTION NO: 100

Which two commands display the list of patches installed on a Solaris system? (Choose two)

- A. `showrew -p`
- B. `pkginfo -l`

Fast Way to get your Certification

- C. patchadd -p
- D. /usr/sbin/prtdiag -v

Answer: A, C

QUESTION NO: 101

Which `ufsdump` command should be used to create and verify an incremental level 5 backup of the file system of the `/dev/rdisk/c0t1d0s4` partition to the default tape device?

- A. `ufsdump 0 /dev/rdisk/c0t1d0s4`
- B. `ufsdump /dev/rdisk/c0t1d0s4 5v`
- C. `ufsdump 5v /dev/rdisk/c0t1d0s4`
- D. `ufsdump 5fv /dev/rdisk/c0t1d0s4`
- E. `ufsdump 5xvf /dev/rmt/1 /dev/rdisk/c0t1d0s4`

Answer: A

QUESTION NO: 102

You want to install a patch cluster on your system to correct several problems. You decide to use the `-nosave` option to the `install_cluster` command.

Which statement correctly describes the effect of this option?

- A. A log file for each patch is not created.
- B. A log file for `install_cluster` is not created.
- C. The individual patches cannot be removed if desired.
- D. An entry for the patch in `/var/sadm/patch` is not created.

Answer: B

QUESTION NO: 103

The second field in the `/etc/group` file is used to store the encoded group password. You have been tasked with placing passwords on all groups.

What is one outcome of doing this?

- A. Access to each group is granted only to users in the group.
- B. Users who are not members of the group can access it if they know the password.

Fast Way to get your Certification

- C. Users who are primary members of the group are required to use the group password to gain access to the group.
- D. Users who are secondary members of the group are required to use the group password to gain access to the group.

Answer: B
