HNS Newsletter
Issue 221 - 12.07.2004.
http://net-security.org

This is a newsletter delivered to you by Help Net Security. It
covers weekly roundups of security events that were in the
news the past week.

DIGITAL CERTIFICATES AUDIO SESSION AND WHITEPAPERS

In this 3:43 minutes long audio learning session, Dr. Phillip
Hallam-Baker, Principle Scientist and Web Services Security Architect
at Verisign, talks about Public Key Cryptography and introduces the
listeners to the importance of digital certificates. This audio
session was sponsored by Thawte.
http://www.net-security.org/article.php?id=709

THAWTE IS OFFERING THE FOLLOWING WHITEPAPERS FOR DOWNLOAD:

Build Customer Confidence with Thawte SSL Web Server Certificates
http://www.net-security.org/v/thawte/g-ssl.html

Securing Your Apache Web Server with a Thawte Digital Certificate
http://www.net-security.org/v/thawte/g-apache.html

Securing your Microsoft IIS Web Server with a Thawte Digital
Certificate
http://www.net-security.org/v/thawte/g-iis.html

MICROSOFT FINALLY PATCHES IE TROJAN VULNERABILITY
Hey it's only been nine months...
http://www.net-security.org/news.php?id=5520

ARMY PLANS NETWORK FORTIFICATION
But budget contraints hamper funding efforts this year.
http://www.net-security.org/news.php?id=5521

FIRST SECURITY SCARE HITS NEXT-GENERATION INTERNET
The US Computer Emergency Readiness Team has issued alerts for some
Juniper routers running IPv6.
http://www.net-security.org/news.php?id=5522

AUTOMATIC BACKUPS WITH RSYNC AND ANACRON
This article and the presented backup procedure is intended for
anyone wishing to keep an effective backup of their important data.
http://www.net-security.org/news.php?id=5523

ROUTE TRACING WITH PHP
Based on the Net_Ping class, Net_Traceroute allows you to trace the
route between your server and a remote host.
http://www.net-security.org/news.php?id=5524

MANAGING NETWORK POLICY
Managing the complexities of large, distributed networks is a
daunting task, with hundreds, even thousands, of mixed-vendor
bridges, switches, routers and gateways.
http://www.net-security.org/news.php?id=5525

SCHOOL TEACHES 'ETHICAL HACKING' TO COMPUTER STUDENTS
Sporting long sideburns, a goatee and black baseball cap, instructor
Ralph Echemendia has a class of 15 buttoned-down corporate, academic
and military leaders spellbound. The lesson: hacking.
http://www.net-security.org/news.php?id=5526

THE ALLURE AND CURSE OF COMPLEXITY
The curse of complexity is the bane of every security administrator,
so UNIX users take your pick: would you like BSD or Linux?
http://www.net-security.org/news.php?id=5527

IEEE APPROVES 802.11I SECURITY SPEC
The IEEE has approved yet another specification in the 802.11 family
of wireless ethernet. This time it's a new Wi-Fi security standard,

dubbed 802.11i.
http://www.net-security.org/news.php?id=5529

THE FUTURE OF INSTANT MESSAGING - SIMPLE, SECURE, AND SELF-MANAGED
With encrypted IM, a unique key session between the user and the
recipient ensures the authenticity of the exchange while providing
valuable log data. The Secure Instant Messenger, a product of
Validian, is poised to change how IM is handled at the enterprise
level.
http://www.net-security.org/news.php?id=5530

HACKERS GRAB BANK DETAILS WITH FAKE AD
The latest virus, with the file name img1big.gif, differs from other
attacks on internet bank customers which have seen a big rise
recently.
http://www.net-security.org/news.php?id=5531

MICROSOFT BATTLES AGAINST SECURITY FAILURES
Security experts are warning that Microsoft's Internet Explorer (IE)
browser is not safe to use.
http://www.net-security.org/news.php?id=5532

INSTANT-MESSAGING VIRUS COSTS A MAN HIS JOB
A virus can transmit previous IM conversations to a user's buddy list
without his or her consent - and with disastrous consequences.
http://www.net-security.org/news.php?id=5533

BAGLE AUTHOR RELEASES 'DANGEROUS' ASSEMBLER CODE
Two new Bagle worm variants and the worm's original assembler source
code were spreading around the Internet on Sunday - a dangerous
development, according to security experts.
http://www.net-security.org/news.php?id=5534

HOW TO GET FALSELY BLACKLISTED FOR RUNNING AN OPEN SPAM RELAY
It's easy. Just sign up with an ISP that issues dynamic IP addresses.
http://www.net-security.org/news.php?id=5535

MICROSOFT, UNDER ATTACK, AIMS TO OFFER SECURITY
Redmond giant to shore up the security of IE in the coming weeks.
http://www.net-security.org/news.php?id=5536

MICROSOFT'S PATCHWORK MESS
After the Download.Ject attack, Microsoft released a "configuration
change" it wants people to apply to installations of the Windows XP,
Windows Server 2003 and Windows 2000 operating systems.
http://www.net-security.org/news.php?id=5537

IPODS POSE SECURITY RISK FOR ENTERPRISES

The iPod may be popular, but also poses such a major security risk for businesses, that enterprises should seriously consider banning the iPod and other portable storage devices, according to a study by research firm Gartner Inc.
http://www.net-security.org/news.php?id=5538

NETWORK SECURITY ANALYSIS TOOLS

This is the review of an extensive collection of network security analysis tools professionally integrated into a bootable Knoppix-based CD.
http://www.net-security.org/news.php?id=5539

FRONT AND BACK: KPGP AND GPG

KGPG is a front-end to GPG, the GNU Privacy Guard. GPG was created to replace PGP, the popular encryption program. GPG is a common component in a Linux system - almost all package utilities use it for verification, for example.
http://www.net-security.org/news.php?id=5540

SMARTPHONE CHIPS BUILD IN DATA SECURITY

Texas Instruments and ARM are working together on a security system for mobile and wireless devices.
http://www.net-security.org/news.php?id=5541

BLAMING USERS FOR VIRUS CHAOS?

The common rallying cry heard around IT Security departments is the need for more security awareness training for corporate users.
http://www.net-security.org/news.php?id=5543

PASSWORD-STEALING TROJAN CUT OFF AT SOURCE

A malicious program that tried to steal banking passwords has been stopped, says Symantec.
http://www.net-security.org/news.php?id=5544

THE BASKET CASE FOR RFID

Radio-frequency chips are retail nirvana. They're the end of privacy. They're the mark of the beast. Peek inside the tag-and-track supermarket of the future.
http://www.net-security.org/news.php?id=5545

HACKER COLLEGE

Sporting long sideburns, a goatee and black baseball cap, US instructor Ralph Echemendia has a class of 15 buttoned-down corporate, academic and military leaders spellbound.
http://www.net-security.org/news.php?id=5546

THE ATTACK OF THE $2 MILLION WORM
Internet-based business disruptions triggered by worms and viruses
are costing companies an average of nearly $2 million in lost revenue
per incident.
http://www.net-security.org/news.php?id=5547

ITU WANTS SPAM DEAD WITHIN TWO YEARS
Conference delegates call for international co-operation to defeat
'epidemic'.
http://www.net-security.org/news.php?id=5548

DOES 802.11I SOLVE YOUR WLAN SECURITY PROBLEMS?
A wireless expert looks at what network managers can expect now that
the 802.11i security standard is ratified.
http://www.net-security.org/news.php?id=5550

OLD-SCHOOL WORM LOVES WINDOWS APPLICATIONS
The latest variant of the Lovgate worm scans PCs for executable files
and then renames them, a tactic used by viruses from a much older
generation, according to antivirus companies.
http://www.net-security.org/news.php?id=5551

SCOTLAND YARD AND THE CASE OF THE RENT-A-ZOMBIES
Vast networks of home computers are being rented out without their
owners' knowledge to spammers, fraudsters and digital saboteurs.
http://www.net-security.org/news.php?id=5552

NEW INTERNET EXPLORER EXPLOIT POSTED ON THE WEB
Microsoft's efforts to neutralize its explosive security problems
once again fell short as a Dutch computer-science student posted an
exploit for the Internet Explorer flaw that the tech giant's latest
patch was supposed to fix.
http://www.net-security.org/news.php?id=5553

MULTI-LAYER INTRUSION DETECTION SYSTEMS
This article discusses mIDS, a system that brings together many
layers of technology into a single monitoring and analysis engine,
from integrity monitoring software such as TripWire, to system logs,
IDS logs, and firewall logs.
http://www.net-security.org/news.php?id=5554

SECURE CORES PROVIDE EXTRA-SMART CARDS
Toppan Printing Co, the world's second largest printing company, has
developed an IC card with high-speed cryptographic processing
capabilities using ARM SecurCore microprocessors.
http://www.net-security.org/news.php?id=5555

SECURITY FAILURES THREATEN ONLINE SHOPPING
Over a million UK consumers have been victims of security breaches
whilst shopping online, which is prompting them to turn their backs
on large online brands.
http://www.net-security.org/news.php?id=5556

SECURITY THREAT GROWING IN UK
But many users are ignoring best practice advice.
http://www.net-security.org/news.php?id=5557

SECURITY SPENDING RISES, AS DO RISKS
Firms failing to follow best practice advice despite increasing their
budgets.
http://www.net-security.org/news.php?id=5558

AN ANSWER TO SECURITY QUESTIONS
Imagine being able to provide your customers with firewall, URL
filtering, virus screening, spam filtering and VPN technologies all
in one, cohesive secure platform. Not possible?
http://www.net-security.org/news.php?id=5559

ANALYST: UN NEEDS WARRIORS IN SPAM BATTLE
An international effort can wipe out spam by 2006, says an agency of
the United Nations, the International Telecommunications Union. The
group is sponsoring an ongoing anti-spam conference in Geneva that
has drawn representatives of more than 60 countries and global
organizations.
http://www.net-security.org/news.php?id=5560

THE CONVERGENCE (OR NOT) OF SECURITY AND OPERATIONS EVENT MONITORING
Event monitoring is of interest from both a security and an
operations perspective, but to date they have tended to be
implemented separately with different toolsets.
http://www.net-security.org/news.php?id=5561

5 SECURITY MYTHS
Like water, hackers take the path of least resistance. Today, this
path leads over Secure Sockets Layer (SSL) to get past most corporate
firewalls, where nothing exists between a hacker, a Web site and the
information it holds.
http://www.net-security.org/news.php?id=5562

SERVICE PACK DEUX?
Microsoft should make SP2 available to all users and backport the
changes to older operating systems, or they risk putting profits
ahead of security yet again.
http://www.net-security.org/news.php?id=5563

COMMENTARY: PATCHED IN 60 SECONDS
Today it was announced that a vulnerability in the Mozilla and
Firefox Web browsers allows the execution of arbitrary code in
Windows NT, 2000, and XP systems.
http://www.net-security.org/news.php?id=5564

SECURITY TOOL COULD PREVENT IPOD RISK
Pointsec Media Encryption secures corporate data on removable media.
http://www.net-security.org/news.php?id=5565

Windows software is located at:
http://net-security.org/software_main.php?cat=1

Linux software is located at:
http://net-security.org/software_main.php?cat=2

Pocket PC software is located at:
http://net-security.org/software_main.php?cat=3

ADVANCED HOST MONITOR 4.42
This is a network monitor program.
http://www.net-security.org/software.php?id=290

ALOAHA 3.0.4
Aloaha is a server based Anti-spam solution.
http://www.net-security.org/software.php?id=566

ANGRY IP SCANNER 2.21
Angry IP scanner is a very fast IP scanner for Windows.
http://www.net-security.org/software.php?id=169

BASTILLE LINUX 2.1.2
The Bastille Hardening System attempts to "harden" or "tighten" the
Linux operating system.
http://www.net-security.org/software.php?id=217

BESTCRYPT 7.10
BestCrypt data encryption systems bring military strength encryption
to the ordinary computer user without the complexities normally
associated with strong data encryption.
http://www.net-security.org/software.php?id=173

CYCLONE 0.8.1
Cyclone is a programming language based on C that is safe, meaning
that it rules out programs that have buffer overflows, dangling
pointers, format string attacks, etc.
http://www.net-security.org/software.php?id=128

DANSGUARDIAN 2.7.7-9
DansGuardian is a web content filter. It filters the actual content
of pages based on many methods including phrase matching, PICS
filtering and URL filtering.
http://www.net-security.org/software.php?id=233

ETHEREAL 0.10.5
Ethereal is a free network protocol analyzer.
http://www.net-security.org/software.php?id=99

ETTERCAP NG-0.7.0
Ettercap is a multipurpose sniffer/interceptor/logger for switched
LAN.
http://www.net-security.org/software.php?id=83

GENERIC SECURITY SERVICE 0.0.11
A Generic Security Service (GSS-API) implementation.
http://www.net-security.org/software.php?id=96

GNU ANUBIS 3.9.94
GNU Anubis is an outgoing mail processor and the SMTP tunnel between
MUA and MTA. It is also a secure/anonymous SMTP client.
http://www.net-security.org/software.php?id=7

HASHISH 1.1b
Hashish is a file and string hashing utility that computes
cryptograhpic hashes.
http://www.net-security.org/software.php?id=226

IDSA 0.96.2
IDSA is a combined system logger, reference monitor, and intrusion
detection system for applications.
http://www.net-security.org/software.php?id=184

IPTABLES 1.2.11
The netfilter/iptables project is the Linux 2.4.x / 2.5.x firewalling
subsystem.
http://www.net-security.org/software.php?id=4

JSCH 0.1.16
JSch is a pure Java implementation of SSH2.
http://www.net-security.org/software.php?id=417

LINKSYSMON 1.1.3
linksysmon is a tool for monitoring Linksys BEFSR41 and BEFSR11
firewalls.
http://www.net-security.org/software.php?id=194

LKL 0.1.0
LKL is a userspace keylogger that runs under Linux on the x86
architechture.
http://www.net-security.org/software.php?id=18

MAILSCANNER 4.31.6-1
MailScanner is a virus scanner for e-mail designed for use on e-mail
gateways.
http://www.net-security.org/software.php?id=144

MOD_SECURITY 1.8.3
ModSecurity is an open source intrusion detection and prevention
engine for web applications.
http://www.net-security.org/software.php?id=518

NESSUS 2.1.0
Nessus is a free, powerful, up-to-date and easy to use remote
security scanner.
http://www.net-security.org/software.php?id=19

NETPIPE 2.0
Netpipe is a socket redirector that will take data in on one port and
redirect that data out onto another port (on another machine)
transparently.
http://www.net-security.org/software.php?id=167

NMAP 3.55
Nmap ("Network Mapper") is an open source utility for network

exploration or security auditing.
http://www.net-security.org/software.php?id=1

NUFW 0.8.0
NuFW is an "authenticating gateway". This means it requires
authentication for any connections to be forwarded through the
gateway.
http://www.net-security.org/software.php?id=526

OS-SIM 0.9.6
OSSIM is a distribution of open source products that are integrated
to provide an infrastructure for security monitoring.
http://www.net-security.org/software.php?id=304

P0F 2.0.3
P0f is a versatile passive OS fingerprinting tool.
http://www.net-security.org/software.php?id=164

PAM_USB 0.3.0
pam_usb is a PAM module that allows you to log in to your Linux box
using a mobile USB storage device such as an USB pen.
http://www.net-security.org/software.php?id=35

PRISMSTUMBLER 0.7.2
PrismStumbler is a wireless LAN (WLAN) which scans for beaconframes
from access points.
http://www.net-security.org/software.php?id=142

PROBOT 2.5.0
ProBot is a powerful and versatile workstation monitoring solution.
http://www.net-security.org/software.php?id=148

QUICKWIPER 7.8
QuickWiper is a file wipe utility with system cleaner.
http://www.net-security.org/software.php?id=177

RUBY/PASSWORD 0.5.1
Ruby/Password is a set of useful methods for creating, verifying, and
manipulating passwords.
http://www.net-security.org/software.php?id=162

SHOREWALL 2.1.0
Shorewall is an iptables based firewall that can be used on a
dedicated firewall system, a multi-function masquerade gateway/server
or on a standalone Linux system.
http://www.net-security.org/software.php?id=40

SYMBION SSL PROXY 1.0.2
The Symbion SSL Proxy listens on a TCP port, accepts SSL connections,
and forwards them to an other (local or remote) TCP port, or UNIX
domain socket.
http://www.net-security.org/software.php?id=186

TUNNELIER 3.24b
Tunnelier is a powerful SSH2 port forwarding client with many
features.
http://www.net-security.org/software.php?id=181

TUXFRW 2.58
TuxFrw is a complete firewall automation tool for GNU/Linux.
http://www.net-security.org/software.php?id=153

VPNMONITOR 1.2
VPNmonitor is a Java application to observe network traffic. Its
purpose is to stress the deficiency in wireless secure connections.
http://www.net-security.org/software.php?id=20

WINFINGERPRINT 0.5.11
Winfingerprint is a Win32 MFC VC++ .NET based security tool that is
able to Determine OS, enumerate users, groups, shares, and more.
http://www.net-security.org/software.php?id=103

WINSCP 3.6.5
WinSCP is an open source SSH file transfer protocol and secure copy
client for Windows using SSH.
http://www.net-security.org/software.php?id=6

WINSSHD 3.26
WinSSHD is an SSH Secure Shell 2 server for Windows NT4, Windows 2000
and Windows XP.
http://www.net-security.org/software.php?id=180
