**VERISIGN SERVICE TAKES ON SPAM**

VeriSign on Monday announced a new e-mail security service designed to stop viruses and spam.

<http://www.net-security.org/news.php?id=5481>

#### CERT RECOMMENDS ANYTHING BUT IE

US Computer Emergency Readiness Team is advising people to ditch Internet Explorer and use a different browser after the latest security vulnerability in the software was exposed.  
<http://www.net-security.org/news.php?id=5482>

#### EXPLOIT USED TO SPREAD VIRUS COULD BE USED AGAIN

Computer experts warn that now that a new way to spread computer viruses has gotten a foothold, it won't be long before others try similar attacks.  
<http://www.net-security.org/news.php?id=5483>

#### ISO ENDORSES KEY SECURITY CERTIFICATION

The International Standards Organization last week gave its stamp of approval to the CISSP security certification for IT workers, and a half-dozen security managers said the endorsement should help enhance the certification's legitimacy and acceptance.  
<http://www.net-security.org/news.php?id=5484>

#### GATES DISHES OUT SECURITY PROMISES

At a news conference in Sydney, Microsoft's chairman said computer systems must become more secure and must be at least as reliable as essential physical infrastructure like electricity and water systems.

<http://www.net-security.org/news.php?id=5485>

#### IBM ANNOUNCES E-MAIL SECURITY MANAGEMENT SERVICES

IBM has announced E-mail Security Management Services, a new managed security service designed to help companies reduce the risks inherent with email communications.  
<http://www.net-security.org/news.php?id=5486>

#### AUTHORS OF THE LAST VIRUSES ARE RUSSIANS

The authors of the last malicious action to spread computer viruses exploiting earlier unknown flaw in the Internet browser are people of Archangelsk, Russia.  
<http://www.net-security.org/news.php?id=5487>

#### MICROSOFT BLAMES HACKERS, NOT VULNERABILITY, FOR WEB ATTACK

The evidence now is leading them to accept Microsoft's explanation that the IIS 5.0 servers were hacked manually and that the server software doesn't have an unknown vulnerability.  
<http://www.net-security.org/news.php?id=5488>

#### ANTI-PHISHING GROUP BACKS EMAIL AUTHENTICATION

A group attempting to stop the new scourge of phishing fraud on the Web says email authentication technology could do the job, a concept backed by Microsoft.  
<http://www.net-security.org/news.php?id=5489>

#### HP PLANS NEW SECURITY CONSCIOUS PCS

Free software that backs up your hard drive automatically will be built into three new PC ranges from Hewlett Packard scheduled for release later this summer.

<http://www.net-security.org/news.php?id=5490>

#### NIST AIMS TO EASE XP SECURITY SETUP

Officials at the National Institute of Standards and Technology hope their new publication will help simplify the process of setting security controls on Microsoft Corp.'s Windows XP Professional operating system.

<http://www.net-security.org/news.php?id=5491>

#### ARM, TI ENTER TECHNOLOGY SECURITY COLLABORATION

In an effort to combat the results of phone theft, ARM said it will collaborate with Texas Instruments Inc. for a security solution using its TrustZone technology.

<http://www.net-security.org/news.php?id=5492>

#### WINDOWS XP SERVICE PACK 2: "A VICTORY FOR THE SECURITY GUYS"

Microsoft has hailed Windows XP Service Pack 2 (SP2) as a "victory for the security guys" and its new features have been welcomed by users at the software giant's annual Tech Ed conference in Amsterdam this week.

<http://www.net-security.org/news.php?id=5493>

#### PATENT FILED FOR VOICE SPAM BLOCKING TECHNOLOGY

A patent application has been filed for a method to identify and block SPIT - spam over Internet telephony, or VoIP spam.

<http://www.net-security.org/news.php?id=5494>

#### SEVENFOLD INCREASE IN PHISHING ATTACKS

Online fraud watchers reported nearly 1,200 new phishing attacks in May, and warned that the number is rising.

<http://www.net-security.org/news.php?id=5495>

#### HNS AUDIO LEARNING SESSION: SQL INJECTION ATTACKS

Caleb Sima, SPI Dynamics CTO, discusses SQL injection attacks, offers practical examples of these vulnerabilities and provides tips on both how to find and how to immunize SQL injection vulnerabilities.

<http://www.net-security.org/news.php?id=5496>

#### VIRUS HITS INDIAN BPO NETWORKS

Infosys Technologies, a leading Bangalore-based software and business process outsourcing (BPO) company, had to bring down its network, following detection of a virus attack on some machines on the network.

<http://www.net-security.org/news.php?id=5497>

#### UK LAWMAKERS WANT MORE COMPUTER HACKERS BEHIND BARS

Computer hacking, an offence police once dismissed as a teenage prank, would carry a maximum two-year prison term as part of a revised cybercrime law proposed by British MPs on Wednesday.  
<http://www.net-security.org/news.php?id=5498>

#### LEARN COMPUTER FORENSICS AT BRADFORD UNIVERSITY

The University of Bradford has introduced a postgraduate course in Forensic Computing, in response to "growing demand for computer scientists" with specialist skills to investigate high tech crimes.  
<http://www.net-security.org/news.php?id=5499>

#### SEVEN HABITS OF HIGHLY SECURE COMPANIES

Companies, like the humans who make them run, are creatures of habit. Some of those habits can make information systems more secure, rather than less. The seven best practices of highly secure companies are a standard against which CEOs can measure their organizations.  
<http://www.net-security.org/news.php?id=5500>

#### BHO SCANNING TOOL AND NEW SCAM TARGETS BANK CUSTOMERS

On June 24th, a visitor to the SANS Internet Storm Center reported that his company was "in the middle of a very disturbing ... issue regarding the adware/spyware/IE exploit genre".  
<http://www.net-security.org/news.php?id=5501>

#### MAGOLD VIRUS WRITER SENTENCED

Sophos is reporting that the creator of the Magold worm has been found guilty and sentenced to two years of probation as well as a fine equivalent to around £1300 to cover court costs.  
<http://www.net-security.org/news.php?id=5502>

#### EXPERTS OUTLINE E-VOTING SECURITY REQUIREMENTS

A panel of IT security experts yesterday proposed a series of detailed recommendations that they said state and local jurisdictions must act on immediately to ensure the security of electronic voting systems and the accuracy and transparency of the November presidential election.  
<http://www.net-security.org/news.php?id=5503>

#### INTERNET SECURITY: WHO NEEDS IT? (YOU DO)

The potential threats are many and varied, so protect yourself better than you believe you should or you could lose it all.  
<http://www.net-security.org/news.php?id=5504>

#### \$1.5M 'HACKER'S HEAVEN' FOR POLY STUDENTS

Homework gets a little unusual for some students at the Singapore Polytechnic, which has set up a \$1.5 million computer centre so they can hack into it and make it crash.  
<http://www.net-security.org/news.php?id=5505>

#### HACKER COUGHS UP ADVICE

You've got to "understand the dark side" to be a good guy in the computer-hacking world, says ethical hack specialist Mike Sues, and most computer users don't have the first clue about the dangers they face.

<http://www.net-security.org/news.php?id=5506>

#### VIRUSES PUTTING SMALL BUSINESS OFF INTERNET

Small businesses in Wales are being put off internet trading by computer viruses and spam, a report has revealed.

<http://www.net-security.org/news.php?id=5507>

#### VIRUSES, VIRUSES EVERYWHERE

I never thought I would pine for the good old days in computing when me and my buddies would take turns typing in the peeks and pokes in endless listings from "RUN" magazine to make my Commodore 64 actually do something.

<http://www.net-security.org/news.php?id=5508>

#### FBI OPENS NEW COMPUTER CRIME LAB

The FBI opened a new lab Tuesday dedicated to detecting computer-related crimes and training federal, state and local police to catch Internet pedophiles, frauds and thieves.

<http://www.net-security.org/news.php?id=5509>

#### SECURE ENOUGH FOR A BANK

In its New York location alone, the Fed maintains more than 10,000 discrete devices, including AS/400, HP-UX, Linux, Novell NetWare, and Sun Solaris servers, as well as a huge installed base of Microsoft Windows. The awesome responsibility of managing these assets falls on the shoulders of Sean Mahon, the New York Fed's vice president of system management.

<http://www.net-security.org/news.php?id=5510>

#### UPSIDE-DOWN SECURITY

How can companies hope to protect their data--and how can we hope to stop identity theft--when we ignore the most basic protection methods?

<http://www.net-security.org/news.php?id=5511>

#### EXPERTS DEBATE SECURITY THROUGH DIVERSITY

The sheer number of worms and viruses directed at Microsoft Corp.'s Windows operating system and Internet Explorer browser have many in the computer industry wondering whether we would all be more secure if more users relied on alternatives to Microsoft's products.

<http://www.net-security.org/news.php?id=5512>

#### NETWORKING: WI-FI SECURITY STILL SPOTTY

A year after WPA's launch, many products aren't certified.  
<http://www.net-security.org/news.php?id=5513>

#### PC WORLD SELLS "NEW" HARD DRIVE WITH PERSONAL DATA

A hard drive sold as new in a major PC World outlet in London on Monday contained a couple's personal data including spreadsheets, VAT information and other sensitive information.  
<http://www.net-security.org/news.php?id=5514>

#### A HOLISTIC APPROACH TO SECURING THE ENTERPRISE

The continuance of malicious computer attacks has made security a front page topic in almost every board room and IT oversight committee. Most IT departments accept that routine updates to software operating environments are a necessary part of managing systems.  
<http://www.net-security.org/news.php?id=5515>

#### SPAMMERS FACE TRI-NATION CRACKDOWN

UK, US and Australia join forces to investigate and prosecute spammers.  
<http://www.net-security.org/news.php?id=5516>

#### WIRETAP RULING COULD SIGNAL END OF E-MAIL PRIVACY

A federal appeals court ruling this week has put a spotlight on the increasingly public nature of e-mail messages and has unraveled expectations that e-mail would gain the same privacy protections as traditional communications.  
<http://www.net-security.org/news.php?id=5517>

#### MICROSOFT IE SECURITY STORM BUILDS

Experts are warning users about Internet Explorer security risks. While the Mozilla or Opera Web browser may be a good choice for some consumers, enterprise alternatives are sketchy.  
<http://www.net-security.org/news.php?id=5518>

#### ENFORCEMENT IS KEY TO FIGHTING CYBERCRIME

The publication of a review of Britain's cybercrime laws by an influential group of MPs and peers this week has been welcomed by the IT industry.

-----

### BOTAN 1.4.0

Botan aims to be a portable, easy to use, and efficient C++ crypto library.

<http://www.net-security.org/software.php?id=94>

### ID\_BANK 1.21

ID\_Bank is a secure identity and password protection system.

<http://www.net-security.org/software.php?id=91>

### MARADNS 1.1.22

MaraDNS is a DNS server that strives to be secure and fully open-sourced.

<http://www.net-security.org/software.php?id=84>

### PAM\_IMAP 0.3.6

This is a PAM module that authenticates a user login against a remote IMAP or IMAPS server.

<http://www.net-security.org/software.php?id=405>

### RSSH 2.2.1

rsch is a restricted shell for use with OpenSSH, allowing only scp and/or sftp.

<http://www.net-security.org/software.php?id=236>

### SHOREWALL 2.0.3b

Shorewall is an iptables based firewall that can be used on a dedicated firewall system, a multi-function masquerade gateway/server or on a standalone Linux system.

<http://www.net-security.org/software.php?id=40>

### VISUALROUTE 8.0f

VisualRoute delivers the functionality of key Internet "ping," "whois," and "traceroute" tools, in a high-speed visually integrated package.
