HNS Newsletter
Issue 231 - 20.09.2004.
http://net-security.org

This is a newsletter delivered to you by Help Net Security. It
covers weekly roundups of security events that were in the
news the past week.

Table of contents:

[**Security news**]

MYDOOM SPAWNS FOUR SMALL OFFSHOOTS
Four minor copies of the program surface, which some security experts
believe indicates that a more lethal MyDoom may be on the way.
http://www.net-security.org/news.php?id=6037

CISCO TO ACQUIRE NETWORK-MONITORING FIRM NETSOLVE
The acquisition of NetSolve will enable Cisco and its channel
partners to offer customers real-time monitoring of Cisco products

and to help ensure continuous, secure operation of such services as
IP telephony and network security, Cisco says.
http://www.net-security.org/news.php?id=6038

MICROSOFT: SASSER BOUNTY HINGES ON CONVICTION
Sven Jaschan, the alleged author of the Sasser worm and several
variants of the Netsky virus, was charged this week by German police,
but the informant who led authorities to the suspect will have to wait
for a promised $250,000 reward, Microsoft officials said Friday.
http://www.net-security.org/news.php?id=6039

RUNING LINUX ON AN IPAQ
Installing Linux on your iPAQ can be a great way to breathe new life
into aging hardware or make an existing tool even better,
particularly if you are a fan of Linux on the desktop.
http://www.net-security.org/news.php?id=6040

SMART CARD USE GROWS
Federal agencies are moving toward large-scale adoption of smart
cards for identification, according to the latest survey from the
Government Accountability Office.
http://www.net-security.org/news.php?id=6041

MANAGING BACKGROUND COMMANDS IN SHELL SCRIPTS
Rainer Raab discusses how to manage multiple background jobs in Korn
shell scripts. After a short job control tutorial, he presents his
job_monitor_status shell function that alerts the calling script when
all background jobs have completed successfully or failed.
http://www.net-security.org/news.php?id=6042

SPAMMERS TWIST MICROSOFT'S GOOD INTO EVIL
According to a recent study, spammers have now begun to use
Microsoft's latest arsenal against spam, the Sender Policy Framework
(SPF), to give their mail a garb of legitimacy.
http://www.net-security.org/news.php?id=6043

U.S.ROBOTICS SECURE STORAGE ROUTER PRO
This device is a multifunctional router with the VPN server and
client support as well as with integrated functions of a network
database.
http://www.net-security.org/news.php?id=6044

OPENBSD'S THEO DE RAADT TALKS SOFTWARE SECURITY
In an exclusive interview with Computerworld's Rodney Gedda, the man
behind an operating system that lays claim to only one remote exploit
in the default install in seven years, reveals where we are headed –
and how far we have to go – in the search for more secure software.
http://www.net-security.org/news.php?id=6045

AKCP CAMERAPROBE8 DATA CENTER SECURITY MONITOR
AKCP has used embedded Linux to build a data center security monitor
that can track both physical and network-related events. The
CameraProbe8 has an integral low-light pan-and-tilt camera, and
supports up to eight environmental sensors. It also runs network
service monitoring software. It is manageable via secure SNMP or
HTTP.
http://www.net-security.org/news.php?id=6046

MS PREMIUM CUSTOMERS GET EARLY SECURITY WARNINGS
Microsoft is giving premium customers advance notice of security
bulletins, internetnews.com has learned.
http://www.net-security.org/news.php?id=6047

ENHANCING APACHE WITH MOD_SECURITY
ModSecurity is an open source intrusion detection and prevention
engine for web applications.
http://www.net-security.org/news.php?id=6048

NEW WINDOWS OS BOOSTS SECURITY
With its next version of Windows, dubbed Longhorn and due out in
2006, Microsoft is working on technology that will give companies
more control over whether to prohibit devices that can easily be used
to transfer data to and from personal computers.
http://www.net-security.org/news.php?id=6049

IDENTITY FRAUD CRISIS SPIRALS OUT OF CONTROL
APACS calls on UK channel players to support anti-CNP schemes.
http://www.net-security.org/news.php?id=6050

WANT MORE SECURE SOFTWARE? THEN GIVE YOUR VENDOR HELL
Software holes will mean security-related downtime will triple by
2008, unless IT managers take matters into their hands.
http://www.net-security.org/news.php?id=6053

CERTICOM ANNOUNCES HARDWARE SECURITY
Digital rights have become a bigger issue for the wireless industry
in the last few years as music and other protected content is offered
by carriers.
http://www.net-security.org/news.php?id=6054

BEWARE OF MALFORMED MIME ARTISTS
The UK's top UK security co-ordination agency today warned of a
series of vulnerabilities involving implementations of the
Multipurpose Internet Mail Extensions (MIME) protocol within email
and web security products.
http://www.net-security.org/news.php?id=6055

HERCULES, STAT SCANNER, BULK UP SECURITY
Financial-services firms get help fixing vulnerabilities with
automated scanning and management applications.
http://www.net-security.org/news.php?id=6056

SP2 FIGHTS WORMS, HAS BUGS
Software conflicts are not the only issue causing some users
heartburn. Many people have downloaded or installed the update
without a hitch, but others have not been so lucky.
http://www.net-security.org/news.php?id=6057

MULTICORE NETWORK SECURITY PROCESSOR
Cavium will sample a line of single-chip, multi-core "network
services processors" (NSPs) in Q1, 2005.
http://www.net-security.org/news.php?id=6058

SAFE DATABASES ARE KEY TO SECURITY
Your database and network design may help prevent critical
vulnerabilities from being exploited.
http://www.net-security.org/news.php?id=6059

EXTREME WI-FI
Take that wireless hot spot in the local java joint, jack it up on
steroids and use it to connect an entire city full of computers.
http://www.net-security.org/news.php?id=6060

I SPY WITH MY LITTLE EYE
Forget Congress' myopic efforts to outlaw spyware. What we really
need is better enforcement of existing computer crime laws.
http://www.net-security.org/news.php?id=6061

SPYCAM MAY BE WATCHING YOU WORK
If you have a webcam and a microphone on your computer and a
broadband connection to the internet, as many now do to chat with
their friends around the world, a hacker could be watching you -
maybe, if your PC is in your bedroom, just when you really needed
privacy.
http://www.net-security.org/news.php?id=6062

SYMANTEC LAUNCHES ANTIPHISHING SERVICE
Symantec is fishing for dollars with a new service designed to help
companies combat the ongoing epidemic of online identity theft, or
"phishing," scams.
http://www.net-security.org/news.php?id=6063

GRAPHS FOR SECURITY
Most programmers are familiar with the access-control list (ACL) as a
datastructure used for authorization. This article describes using a

more robust structure called an access-control graph (ACG). The ACG
has several advantages over traditional ACL designs and has special
relevance in Web-based applications.
http://www.net-security.org/news.php?id=6064

WIRED FOR SECURITY
McAfee has always been synonymous with PC security, but CEO George
Samenuk intends to make a priority of protecting wireless networks
and voice communications over the Internet.
http://www.net-security.org/news.php?id=6066

ANALYSTS HERALD ARRIVAL OF SMART SECURITY PATCHING TOOLS
IT security managers can look forward to the arrival of enhanced
patching technology which will automate and reduce the cost of
installing software security and maintenance updates, industry
experts have predicted.
http://www.net-security.org/news.php?id=6067

SQL SERVER 2000 SECURITY - DTS SECURITY
In this article of our series presenting SQL Server 2000 Security, we
are turning our attention towards Data Transformation Services.
http://www.net-security.org/news.php?id=6068

INTERNET STANDARDS BODY REJECTS SENDER ID PROPOSAL
The Internet Engineering Task Force has rejected Microsoft's Sender
ID proposal due to the company's refusal to reveal details of a
possible patent application on its proposed technology.
http://www.net-security.org/news.php?id=6069

IBM EXPANDS RFID SERVICES FOR MANUFACTURERS
IBM will offer a range of new services to help industrial firms
respond to retail and government pressure to implement
radio-frequency identification. RFID services will include
consulting, developing the business case, technological proof of
concept, and full rollout of the systems.
http://www.net-security.org/news.php?id=6070

BORDERWARE FIREWALL FIGHTS VOIP THREATS
BorderWare Technologies Inc. has joined Ingate Systems AB and others
in providing an edge solution to the external threat problem in
voice-over-IP PBXes.
http://www.net-security.org/news.php?id=6071

NOKIA JOINS SECURE DIGITAL INDUSTRY GROUP
Nokia said it has joined an industry group working on technical and
specification standards for Secure Digital memory card applications.
http://www.net-security.org/news.php?id=6072

SUN TOUTS TOUGHER SECURITY IN SOLARIS 10
Sun Microsystems said its Solaris 10 operating system will be ready
for general release by year's end, complete with a sharper set of
security teeth.
http://www.net-security.org/news.php?id=6073

BRAZIL IS WORLD 'HACKING CAPITAL'
Brazil has become the global capital for computer hacking and
internet fraud, according to experts meeting in the country's
capital, Brasilia.
http://www.net-security.org/news.php?id=6074

WARDRIVING: YOU CAN LOOK, BUT DON'T TOUCH
Is wardriving legal? Until a court rules otherwise, it is. But should
you access an open wireless network you stumble upon? The answer is
no.
http://www.net-security.org/news.php?id=6075

MAJOR GRAPHICS FLAW THREATENS WINDOWS PCS
Microsoft published on Tuesday a patch for a major security flaw in
its software's handling of the JPEG graphics format and urged
customers to use a new tool to locate the many applications that are
vulnerable.
http://www.net-security.org/news.php?id=6076

SAMBA SERVERS VULNERABLE TO DENIAL-OF-SERVICE ATTACKS
The Samba Team released on Tuesday a patch to fix two flaws that
could result in disruptions for networks using the widely installed
Unix and Linux software.
http://www.net-security.org/news.php?id=6077

SUPER-SECURE NETWORK COULD FLAG DATA DANGER
It's a hacker's nightmare but a dream for bankers and spies: A
computer network so secure that even the simplest attempts to
eavesdrop will interrupt the flow of data and alert administrators to
the snooping.
http://www.net-security.org/news.php?id=6078

INTRUSION DETECTION WITH TRIPWIRE
Tripwire is a file integrity checker for UNIX/Linux based operating
systems and works as an excellent intrusion detection system.
http://www.net-security.org/news.php?id=6079

SERVICE MONITORING WITH NAGIOS
Nagios calls itself an "open source host, service and network
monitoring program".
http://www.net-security.org/news.php?id=6080

FIVE FIRED AT LOS ALAMOS LAB
As part of the fallout from an incident at Los Alamos National Lab in
July, five workers have been fired. They are among 23 suspended when
computer disks containing classified information went missing.
http://www.net-security.org/news.php?id=6081

MICROSOFT NOT TRYING TO HIJACK ANTI-SPAM SPEC
Though it has raised concerns about Microsoft's Sender ID anti-spam
technology, the Internet Engineering Task Force, an organization
devoted to establishing standards for Internet architecture, has not
banned the software giant's participation in the development of an
e-mail specification.
http://www.net-security.org/news.php?id=6082

GIVE US A JOB, PLEAD VIRUS WRITERS
Antivirus developers have to ensure that their software works
reliably, detecting over 90,000 viruses on a wide variety of
operating systems and network configurations without causing
problems, explained consultant Graham Cluley. "Virus writers don't
care if their code crashes or causes incompatibilities. You don't
have to be a genius to write a virus," he said.
http://www.net-security.org/news.php?id=6083

FEDS SAY LAMO INSPIRED OTHER HACKERS
Prosecutors blame the New York Times hacker for inspiring others of
his generation to become cyber outlaws.
http://www.net-security.org/news.php?id=6084

ACADEMIA BATTLES FORCES OF IT ANARCHY
Academic institutions who have to add, manage, and secure thousands
of new users within a period of just a few days face political and
social issues on top of the immense technical ones, suggests Scott
Granneman.
http://www.net-security.org/news.php?id=6085

BUG DETECTED IN UNIX AND LINUX ADMIN CONSOLE
A bug in Usermin, a widely used administration console for Unix and
Linux, could allow a hacker to run malicious code through a specially
crafted email, reported security researchers.
http://www.net-security.org/news.php?id=6086

MYSQL ADMINISTRATOR
In this article, the author recommends MySQL Administrator, which
allows an adminstrator to configure a MySQL server easily.
http://www.net-security.org/news.php?id=6087

EXTORTION ONLINE
Technology can help fight the growing cyberextortion threat, but
experts say not enough companies are prepared.
http://www.net-security.org/news.php?id=6088

SHARING FILES OVER A NETWORK WITH NFS
As users chose to supplement their RISC OS computers with a second
machine, there grows a need to manage files over a network. With this
in mind, Paul Stewart guides us through evaluating and configuring NFS
with RISC OS and Windows.
http://www.net-security.org/news.php?id=6089

MAN PLEADS GUILTY IN MASSIVE CREDIT INFO THEFT CASE
Personal financial information stolen from more than 30,000 people
http://www.net-security.org/news.php?id=6090

BUGWATCH: MANAGING NETWORK SECURITY RISK
Jukka Sieppi, director of product management at network protection
firm Stonesoft, warns of the dangers of adopting a so-called 'silver
bullet' solution to network security.
http://www.net-security.org/news.php?id=6091

PHONES GAIN CODED SECURITY
"Pressure for greater security is coming from enterprise customers.
[Security] used to be seen as an add-on to IT systems, but lately it
has been regarded as something that has to be embedded from the
beginning," commented Certicom's vice-president of marketing, Roy
Pereira.
http://www.net-security.org/news.php?id=6092

SYMANTEC TO ACQUIRE @STAKE
Symantec has agreed to acquire @Stake, a Cambridge, Mass.-based
provider of IT security consulting services.
http://www.net-security.org/news.php?id=6093

HACKERS JUMP ON WINDOWS VULNERABILITY
Hackers are drooling at the thought of exploiting Microsoft's most
recent vulnerabilities, security analysts said Thursday.
http://www.net-security.org/news.php?id=6094

NEC EXTENDS QUANTUM CRYPTOGRAPHY RANGE AND SPEED
NEC researchers have developed a quantum cryptography system with
sufficient speed and range to make it commercially viable. It could
go on sale in the second half of 2005.
http://www.net-security.org/news.php?id=6095

MICROSOFT: SECURITY NOW KEY ISSUE IN BROWSER MARKET
Another security scare has hit Microsoft's Internet Explorer.
http://www.net-security.org/news.php?id=6096

HACKERS SEEK TO SAVE AMERICA
A new cyber security centre has been launched in a remote area of
eastern Idaho in the US to give expert hackers access to an entire
isolated infrastructure to test computing vulnerabilities.
http://www.net-security.org/news.php?id=6097

SSH - THE SECURE SHELL: AN OVERVIEW
SSH is an application protocol and software suite that allows secure
network services over an insecure network such as the public
Internet.
http://www.net-security.org/news.php?id=6098

HOW TO PROTECT YOURSELF IF YOU USE WINDOWS
If you use a Windows personal computer to access the Internet, your
personal files, your privacy and your security are all in jeopardy.
http://www.net-security.org/news.php?id=6099

OPEN SOURCE SECURITY: STILL A MYTH
This article looks at why open source software may currently be less
secure than its commercial counterparts.
http://www.net-security.org/news.php?id=6100

[**Vulnerabilities**]

All vulnerabilities are located here:
http://www.net-security.org/archive_vuln.php

Microsoft WordPerfect 5.x Converter Heap Overflow Vulnerability
http://www.net-security.org/vuln.php?id=3713

IE6 + XP SP2 Vulnerability
http://www.net-security.org/vuln.php?id=3712

Vulnerability In IBM Windows XP Default Hidden Administrator Account
Allows Local Administrator Access
http://www.net-security.org/vuln.php?id=3711

Apache Config File Env Variable Buffer Overflow Vulnerability
http://www.net-security.org/vuln.php?id=3710

SMC7004VWBR / SMC7008ABR "Spoofing" Vulnerability
http://www.net-security.org/vuln.php?id=3709

McAfee VirusScan Privilege Escalation Vulnerability
http://www.net-security.org/vuln.php?id=3708

Microsoft Office WordPerfect Converter Buffer Overflow Vulnerability
http://www.net-security.org/vuln.php?id=3707

SUS 2.0.2 Local Root Vulnerability
http://www.net-security.org/vuln.php?id=3706

Inkra 1504GX DoS In Conducting IP Protocol Vulnerability
http://www.net-security.org/vuln.php?id=3705

Qnx Crrtrap Possible Race Condition Vulnerability
http://www.net-security.org/vuln.php?id=3704

[**Advisories**]

All advisories are located at:
http://www.net-security.org/archive_advi.php

SUSE Security Announcement - XFree86-libs, xshared (SUSE-SA:2004:034)
http://www.net-security.org/advisory.php?id=3756

Gentoo Linux Security Advisory - SnipSnap: HTTP response splitting
(GLSA 200409-23)
http://www.net-security.org/advisory.php?id=3755

SUSE Security Announcement - gtk2, gdk-pixbuf (SUSE-SA:2004:033)
http://www.net-security.org/advisory.php?id=3754

Debian Security Advisory - New gtk+2.0 packages fix several
vulnerabilities (DSA 549-1)
http://www.net-security.org/advisory.php?id=3753

Apple Security Update - Security Update 2004-09-16
(APPLE-SA-2004-09-16)
http://www.net-security.org/advisory.php?id=3752

Gentoo Linux Security Advisory - phpGroupWare: XSS vulnerability in
wiki module (GLSA 200409-22)
http://www.net-security.org/advisory.php?id=3751

Gentoo Linux Security Advisory - Apache 2, mod_dav: Multiple
vulnerabilities (GLSA 200409-21)
http://www.net-security.org/advisory.php?id=3750

US-CERT Technical Cyber Security Alert - Microsoft Windows JPEG
component buffer overflow (TA04-260A)
http://www.net-security.org/advisory.php?id=3749

Trustix Secure Linux Security Advisory - apache, cups,
foomatic-filters, iptables, squid (TSLSA-2004-0047)
http://www.net-security.org/advisory.php?id=3748

Debian Security Advisory - New imlib packages fix arbitrary code
execution (DSA 548-1)
http://www.net-security.org/advisory.php?id=3747

Gentoo Linux Security Advisory - mpg123: Buffer overflow
vulnerability (GLSA 200409-20)
http://www.net-security.org/advisory.php?id=3746

Debian Security Advisory - New Imagemagic packages fix buffer
overflows (DSA 547-1)
http://www.net-security.org/advisory.php?id=3745

Debian Security Advisory - New gdk-pixbuf packages fix several
vulnerabilities (DSA 546-1)
http://www.net-security.org/advisory.php?id=3744

Gentoo Linux Security Advisory - Heimdal: ftpd root escalation (GLSA
200409-19)
http://www.net-security.org/advisory.php?id=3743

Turbolinux Security Announcement - krb5, php, squid, samba, cdrtools, imlib, httpd (16/Sep/2004)
http://www.net-security.org/advisory.php?id=3742

Mandrakelinux Security Update Advisory - Updated XFree86 packages fix libXpm overflow vulnerabilities (MDKSA-2004:099)
http://www.net-security.org/advisory.php?id=3741

Mandrakelinux Security Update Advisory - Updated libxpm4 packages fix libXpm overflow vulnerabilities (MDKSA-2004:098)
http://www.net-security.org/advisory.php?id=3740

Mandrakelinux Security Update Advisory - Updated cups packages fix DoS vulnerability (MDKSA-2004:096)
http://www.net-security.org/advisory.php?id=3739

Mandrakelinux Security Update Advisory - Updated apache2 packages fix multiple vulnerabilities (MDKSA-2004:096)
http://www.net-security.org/advisory.php?id=3738

Mandrakelinux Security Update Advisory - Updated gdk-pixbuf packages fix image loading vulnerabilities (MDKSA-2004:095)
http://www.net-security.org/advisory.php?id=3737

Debian Security Advisory - New cupsys packages fix denial of service (DSA 545-1)
http://www.net-security.org/advisory.php?id=3736

Mandrakelinux Security Update Advisory - Updated printer-drivers packages fix vulnerability in foomatic (MDKSA-2004:094)
http://www.net-security.org/advisory.php?id=3735

Mandrakelinux Security Update Advisory - Updated squid packages fix DoS vulnerability (MDKSA-2004:093)
http://www.net-security.org/advisory.php?id=3734

SUSE Security Announcement - apache2 (SUSE-SA:2004:032)
http://www.net-security.org/advisory.php?id=3733

SUSE Security Announcement - cups (SUSE-SA:2004:031)
http://www.net-security.org/advisory.php?id=3732

OpenPKG Security Advisory - aspell (OpenPKG-SA-2004.042)
http://www.net-security.org/advisory.php?id=3731

OpenPKG Security Advisory - spamassassin (OpenPKG-SA-2004.041)
http://www.net-security.org/advisory.php?id=3730

OpenPKG Security Advisory - samba (OpenPKG-SA-2004.040)
http://www.net-security.org/advisory.php?id=3729

Microsoft Security Bulletin - Septermber 2004
http://www.net-security.org/advisory.php?id=3728

Gentoo Linux Security Advisory - cdrtools: Local root vulnerability
in cdrecord if set SUID root (GLSA 200409-18)
http://www.net-security.org/advisory.php?id=3727

Gentoo Linux Security Advisory - SUS: Local root vulnerability (GLSA
200409-17)
http://www.net-security.org/advisory.php?id=3726

Debian Security Advisory - New webmin packages fix insecure temporary
directory (DSA 544-1)
http://www.net-security.org/advisory.php?id=3725

Slackware Security Advisory - samba DoS (SSA:2004-257-01)
http://www.net-security.org/advisory.php?id=3724

Mandrakelinux Security Update Advisory - Updated samba packages fix
multiple vulnerabilities (MDKSA-2004:092)
http://www.net-security.org/advisory.php?id=3723

Conectiva Linux Security Announcement - zlib (CLA-2004:865)
http://www.net-security.org/advisory.php?id=3722

Conectiva Linux Security Announcement - kde (CLA-2004:864)
http://www.net-security.org/advisory.php?id=3721

OpenPKG Security Advisory - kerberos (OpenPKG-SA-2004.039)
http://www.net-security.org/advisory.php?id=3720

Gentoo Linux Security Advisory - Samba: Denial of Service
vulnerabilities (GLSA 200409-16)
http://www.net-security.org/advisory.php?id=3719

Gentoo Linux Security Advisory - Webmin, Usermin: Multiple
vulnerabilities in Usermin (GLSA 200409-15)
http://www.net-security.org/advisory.php?id=3718

MOVING TO THE LINUX BUSINESS DESKTOP
I've read countless articles debating whether Linux is ready for the desktop showcasing the strengths and weaknesses of this OS. This book goes beyond that discussion as the author doesn't think Linux is just ready for the desktop but for the business desktop. Did Gagne manage to guide the reader as well as in his previous books? Read on and find out.
