

**HNS Newsletter**

Issue 232 - 27.09.2004.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

---

**IBM Secure World Technical University - November 23-26 - Berlin**

Do you know how effectively you can protect your IT infrastructure?

---

Security has become a very important concern in today's wireless and network computing business. This conference offers 70 sessions organised around 5 main topics: Security Risk Management, Physical & Logical Security Integration and Recovery, Security Architectures & Solutions, Security Management and Control. In addition, you will also have the possibility to take part to a Technology Solutions Forum, during which IBM and its Partners will demonstrate their latest security solutions. Find out more on <http://www.ibm.com/services/learning/conf/europe/securew>

---

**Table of contents:**

- 1) Security news
- 2) Vulnerabilities
- 3) Advisories
- 4) Reviews
- 5) Software
- 6) Webcasts
- 7) Conferences
- 8) Security World

**A VISUAL HISTORY OF SPAM AND VIRUS EMAILS**

Raymond chen, a Microsoft employee has kept every single piece of spam since mid-1997. The results were then put into a graph to show a visual representation of spam and viruses received for the last 6 years.

<http://www.net-security.org/news.php?id=6101>

#### NET SECURITY THREATS GROWING FAST

More than 30,000 PCs per day are being recruited into secret networks that spread spam and viruses, a study shows.

<http://www.net-security.org/news.php?id=6102>

#### A FEAST OF ANTI-SPAM

The proliferation of anti-spam offerings has left many businesses bewildered. Which products should they choose?

<http://www.net-security.org/news.php?id=6103>

#### ARREST MADE IN CISCO SOURCE CODE THEFT

Police in the UK have arrested a man in connection with the theft of source code from networking equipment maker Cisco Systems in May, a Scotland Yard spokeswoman confirmed on Friday.

<http://www.net-security.org/news.php?id=6104>

#### MICROSOFT TRIALS PIRACY LOCK ON DOWNLOAD CENTER

New feature locks out pirated copies of Windows.

<http://www.net-security.org/news.php?id=6105>

#### VMWARE - SECURE ACCESS GOES VIRTUAL

VMware offers a new option for controlling access to corporate systems.

<http://www.net-security.org/news.php?id=6106>

#### 4 TIPS FOR A STRONG DEFENSE

Agency efforts to tighten system security have evolved in recent months from documenting weaknesses to deploying security safeguards, said experts familiar with federal programs.

<http://www.net-security.org/news.php?id=6107>

#### FTC BACKS SPAMMER BOUNTIES (FALSE)

A program to encourage members of the public to become "bounty hunters" tracking down email spammers received the luke warm backing of the US Federal Trade Commission (FTC).

<http://www.net-security.org/news.php?id=6108>

#### HACKERS DEPLOYING 'BOTS' ON A MASSIVE SCALE

Symantec reports up to 75,000 PCs being compromised daily.

<http://www.net-security.org/news.php?id=6109>

#### GARTNER: INFORMATION SECURITY IS STILL KEY

Despite claims from some quarters that security will cease to be a key issue over the next few years, Gartner stressed today that information security will remain a major executive concern for the foreseeable future.

<http://www.net-security.org/news.php?id=6112>

#### ORACLE SECURITY PATCHES CAUSING HEADACHES

Oracle Corp. released a batch of security patches earlier this month, addressing dozens of vulnerabilities discovered this year. With limited information on each patch, DBAs are being forced to take entire systems out of production.

<http://www.net-security.org/news.php?id=6113>

#### MICROSOFT-CISCO SECURITY FIGHT HURTS US ALL

Microsoft and Cisco pachyderms are fighting over network security standards, and the losers, once again, are the folks on the ground.

<http://www.net-security.org/news.php?id=6114>

#### SASSER AUTHOR GETS IT SECURITY JOB

Securepoint technical director Lutz Hausmann says the teenager deserved a second chance.

<http://www.net-security.org/news.php?id=6115>

#### AVOID SECURITY TOOLS YOU DON'T NEED

Many technologies may be a waste of time and money, researcher says.

<http://www.net-security.org/news.php?id=6116>

#### CAN ALL-IN-ONE SECURITY APPLIANCES SECURE THE NETWORK?

Some might do the job, but consultants recommend a layered security approach.

<http://www.net-security.org/news.php?id=6117>

#### HACKERS COSTING ENTERPRISES BILLIONS

Hackers continued adding billions to the cost of doing business on the Internet in the first half of 2004, despite security executives' efforts to prevent malicious attacks.

<http://www.net-security.org/news.php?id=6118>

#### NMAP EXAMINATION OF VARIOUS OPERATING SYSTEMS

The purpose of this short comparison is to perform some sort of evaluation of the quality of the TCP/IP stack which is implemented differently in various Operating Systems.

<http://www.net-security.org/news.php?id=6119>

#### SECURE ID TAGS AT AOL

Internet provider introduces new service to put a 'dead bolt' on accounts.

<http://www.net-security.org/news.php?id=6120>

#### THE BUILDING BLOCKS OF A CUSTOMIZED SECURITY SERVICE

New IP VPN services can be customized to fit specific user needs, speeding time-to-market without investing in dedicated hardware or applications.

<http://www.net-security.org/news.php?id=6121>

#### I/O DEVICES ARE TRUSTED WITH PC SECURITY

Two new SafeKeeper Trusted Input/Output (I/O) devices are designed to embed security into desktop and notebook computer motherboards.

<http://www.net-security.org/news.php?id=6122>

#### OFFSHORE SECURITY CAN BE COMPROMISED BY CULTURAL DIFFERENCES

Gartner has warned companies that outsource to countries like India and China not to overlook the impact of cultural differences on security.

<http://www.net-security.org/news.php?id=6123>

#### SECURITY FEARS STILL BLOCKING WLAN ADOPTION

Despite the best efforts of the Wi-Fi industry to assure companies wireless networking is safe in the workplace, a new survey of executives finds security remains the leading barrier to WLAN adoption.

<http://www.net-security.org/news.php?id=6124>

#### BACKING UP YOUR LINUX DESKTOP WITH RSYNC

This article explain how to use rsync to backup your computer to a drive attached to your system.

<http://www.net-security.org/news.php?id=6125>

#### UNCLE SAM DEMANDS ALL AIR TRAVEL RECORDS

The US Transportation Security Administration (TSA) has demanded the passenger records of all domestic flights during the month of June, 2004, so that it can test its new "CAPPS Lite" data mining operation before putting it into production, the Associated Press reports.

<http://www.net-security.org/news.php?id=6126>

#### ACTIVISTS FIND MORE E-VOTE FLAWS

More weaknesses appear in the Diebold electronic voting system that activists say could be used to rig the November election. The company says auditing procedures would catch any vote fraud.

<http://www.net-security.org/news.php?id=6127>

#### THERE'S 100,000 OF THEM... AND THEY'RE AFTER YOU

As a new study reveals that the number of malicious computer programs has reached the 100,000 mark for the first time, Adrian Mather looks at the dangers facing us in our own homes and what we can do to ward off an attack.

<http://www.net-security.org/news.php?id=6128>

#### THE SPY THREAT FROM THE INTERNET

Browsing the web can let unwanted visitors into your system - and simple anti-virus software can't catch them.

<http://www.net-security.org/news.php?id=6129>

#### INFORMATION SECURITY FAILS TO REACH THE BOARDROOM

Global security survey shows need for greater awareness still an issue.

<http://www.net-security.org/news.php?id=6130>

#### DHS EXPANDS BIOMETRIC USE

Biometric programs should be expanded to fight terrorism and crime, a Homeland Security Department official said.

<http://www.net-security.org/news.php?id=6131>

#### EXPLOIT POSTED FOR MICROSOFT JPEG FLAW

Customers are urged to install software updates.

<http://www.net-security.org/news.php?id=6132>

#### HACKERS HIT CREDIT CARD COMPANY

DDoS attack on e-commerce service provider is preceded by an extortion note.

<http://www.net-security.org/news.php?id=6133>

#### BILL WOULD NARROW INTRUDER SURVEILLANCE

Senate proposal would scale back a provision of the USA Patriot Act that lets the FBI monitor alleged computer trespassers without a warrant

<http://www.net-security.org/news.php?id=6134>

#### 4 MUST-HAVE SECURITY SOLUTIONS

Vulnerability and automated patch management top the list.

<http://www.net-security.org/news.php?id=6135>

#### IRELAND CRACKS DOWN ON NET SCAMS

Calls to 13 other countries will be blocked to thwart auto-dialer software.

<http://www.net-security.org/news.php?id=6136>

#### P-CUBE GOES HUNTING FOR ZOMBIE PCS

P-Cube, the traffic management firm Cisco agreed to buy for \$200m last month, is aiming to tackle the problem of spam at source by detecting and quarantining spam zombie machines.

<http://www.net-security.org/news.php?id=6137>

#### FIRM JUSTIFIES JOB FOR VIRUS WRITER

A German computer security firm has defended its decision to hire the self-confessed teenage author of the Sasser and Netsky worms.

<http://www.net-security.org/news.php?id=6138>

#### NOKIA BREAKS INTO HOME SECURITY MARKET

Wireless home monitoring device controlled by text message.  
<http://www.net-security.org/news.php?id=6139>

#### ARE FIREWALLS USEFUL? AND ANOTHER THING...

Address spoofing depends crucially on being able to hide the real source address, so why not make that impossible? One way to do it would be to have all the ISPs and network carriers whose connections constitute the Internet certify where packets entering the network come from.  
<http://www.net-security.org/news.php?id=6140>

#### FRENCH DEFENSE MINISTRY COMMISSIONS HIGH-SECURITY LINUX

The French Ministry of Defense has awarded an \$8.6 million, three-year contract to a consortium of companies, including Linux vendor Mandrakesoft, to develop a highly secure Linux operating system.  
<http://www.net-security.org/news.php?id=6141>

#### IT SECURITY CULTURE MUST START FROM THE TOP

Global survey warns senior execs against 'delegating' security awareness.  
<http://www.net-security.org/news.php?id=6142>

#### MAC OR PC? WINDOWS' SECURITY ISSUES HELP USERS CHOOSE

This virus and security problem might be the biggest challenge to Microsoft in years. The message I get is that people are fed up with the vulnerability of Windows. They are increasingly willing to consider other options. And, for whatever reasons, Apple's Macintosh and Linux-based computers hardly get infected or invaded at all.  
<http://www.net-security.org/news.php?id=6143>

#### ANTI-SPAM STANDARD BODY DISMANTLED

Row over Microsoft's Sender ID leads to disbanding of IETF working group.  
<http://www.net-security.org/news.php?id=6144>

#### SYSTEM ATTACKERS UP THE ANTE

Attacks are not only rising in number, but in speed and sophistication too.  
<http://www.net-security.org/news.php?id=6145>

#### HARDENING LINUX AUTHENTICATION AND USER IDENTITY

PAM is an authentication mechanism that originated on Solaris, but is used on various systems, including Linux.  
<http://www.net-security.org/news.php?id=6146>

#### IDENTITY THEFT ON THE RISE IN THE UK

But neither banks nor consumers are doing enough to mitigate the risk.

<http://www.net-security.org/news.php?id=6147>

#### HOUSE DROPS PLANS TO MOVE CYBERSECURITY ROLE TO WHITE HOUSE

House Republican leaders backed away Thursday from a proposal to move important cybersecurity functions from the Homeland Security Department to the White House budget office.

<http://www.net-security.org/news.php?id=6148>

#### WIRELESS TIP: DON'T HIDE FROM RISK

The best wireless network security is to not have a wireless network, according to Defense and intelligence experts.

<http://www.net-security.org/news.php?id=6149>

#### VIRUS WRITERS FOCUS ON IMAGE BUG

A critical weakness found in many Microsoft programs looks like it is about to be exploited by virus writers.

<http://www.net-security.org/news.php?id=6150>

### AIRSNORT 0.2.6 (Linux)

AirSnort is a wireless LAN (WLAN) tool which recovers encryption keys.  
<http://www.net-security.org/software.php?id=262>

### DEVICELOCK 5.61 (Windows)

DeviceLock gives network administrators control over which users can access what devices on a local computer.  
<http://www.net-security.org/software.php?id=121>

### ETTERCAP NG-0.7.1 (Linux)

Ettercap is a multipurpose sniffer/interceptor/logger for switched

LAN.

<http://www.net-security.org/software.php?id=83>

MIMEDEFANG 2.45 (Linux)

MIMEDefang is a flexible MIME email scanner designed to protect Windows clients from viruses.

<http://www.net-security.org/software.php?id=214>

MY PASSWORD MANAGER 0.2 (Linux)

My Password Manager is a light-weight password manager.

<http://www.net-security.org/software.php?id=61>

NESSUS 2.1.3 (Linux)

Nessus is a free, powerful, up-to-date and easy to use remote security scanner.

<http://www.net-security.org/software.php?id=19>

NUFW 0.9.3 (Linux)

NuFW is an "authenticating gateway". This means it requires authentication for any connections to be forwarded through the gateway.

<http://www.net-security.org/software.php?id=526>

POCKET WARRIOR 15022003-B (Pocket PC)

Pocket Warrior is a Pocket PC WiFi 802.11b Prism auditing software.

<http://www.net-security.org/software.php?id=575>

PORTSLOCK 1.56 (Windows)

PortsLock is a personal firewall for Windows NT/2000/XP that fully supports user-level security.

<http://www.net-security.org/software.php?id=120>

SHELL INTRUSION DETECTION 0.3.10 (Linux)

SID is a Shell Intrusion Detection system. The kernel part plugs into a terminal-processing subsystem and logs hashed terminal lines.

<http://www.net-security.org/software.php?id=473>

YASSL 0.3.5 (Linux)

yaSSL is an SSL Library for programmers building security functionality into their applications and devices.

<http://www.net-security.org/software.php?id=521>

**IBMSecure World Technical University - November 23-26 - Berlin**

Do you know how effectively you can protect your IT infrastructure?

-----  
Security has become a very important concern in today's wireless and network computing business. This conference offers 70 sessions organised around 5 main topics: Security Risk Management, Physical & Logical Security Integration and Recovery, Security Architectures & Solutions, Security Management and Control. In addition, you will also have the possibility to take part to a Technology Solutions Forum, during which IBM and its Partners will demonstrate their latest security solutions. Find out more on  
<http://www.ibm.com/services/learning/conf/europe/securew>
