[**Security news**]

US CYBERSECURITY CZAR QUITS
US cybersecurity czar Amit Yoran announced his resignation on Friday after a year in the job.
http://www.net-security.org/news.php?id=6206

SURFCONTROL UNVEILS SECURITY APPLIANCE
Vendor to seek distribution as it enters the hardware arena.
http://www.net-security.org/news.php?id=6207

POLL SHOWS MOST AMERICANS CLUELESS ABOUT VIRUS RISKS
About one in three Americans think it's more likely they'll be
audited by the IRS or win the lottery than fall victim to a virus or
worm.
http://www.net-security.org/news.php?id=6208

MOBILE PHONE VIRUS GOES 'WILD'
First outbreak of Cabir reported in Singapore, says F-Secure.
http://www.net-security.org/news.php?id=6209

CALIFORNIA GOES AFTER SPYWARE
The Golden State passes a law aimed at cracking down on what some
feel is the internet's next scourge -- spyware. But critics say it's
only a partial step toward protecting consumers.
http://www.net-security.org/news.php?id=6210

THINKPAD WITH FINGERPRINT READER IS INTRODUCED
Hoping to drive biometric devices into the mainstream, IBM on Monday
unveiled its first ThinkPad that features an integrated fingerprint
reader that will work in tandem with an embedded security system.
http://www.net-security.org/news.php?id=6211

NET GIANTS ADOPT ANTI-SPAM SYSTEM
The fight against spam is getting more serious as the net's big
players impose conditions on bulk mail senders.
http://www.net-security.org/news.php?id=6212

AND THE SCAMS GO ON...
People continue to fall prey to phishing scams regularly.
http://www.net-security.org/news.php?id=6213

SUPER-CONNECTED USERS COULD AID IM WORMS
Just a few users connected to popular instant messaging networks can
cause the spread of worms, while choking off communications from
"highly connected" users with many IM correspondents can slow the
spread of worms, computer researchers say.
http://www.net-security.org/news.php?id=6214

BIOMETRICS VENDOR TARGETS SECURITY CONSCIOUS ENTERPRISES
This industry is growing very fast, and some analysts say it will be
worth US$2 billion within a couple of years.
http://www.net-security.org/news.php?id=6215

MICROSOFT PREVIEWS WINDOWS XP EMBEDDED WITH SP2
New features to strengthen security, deliver greater manageability
and fuel innovation.
http://www.net-security.org/news.php?id=6216

DECRU UNVEILS STORAGE SECURITY SOFTWARE
Decru announced a software module for its DataFort storage security
product that prevents unauthorized users, IT managers and viruses
from accessing network data.
http://www.net-security.org/news.php?id=6217

CONSUMERS UNCONCERNED ABOUT CYBERTHREATS
A study conducted by the National Cyber Security Alliance as part of
its Cyber Security Awareness Month found that many users grossly
underestimate the danger of cyber attacks. Three out of ten think
they are more likely to be struck by lightning than hit by hackers.
http://www.net-security.org/news.php?id=6218

IIS ROUNDS THE SECURITY CORNER
It used to be exciting to read the new Web server share numbers from
Netcraft every month. For a while there, Apache and Microsoft's IIS
(Internet Information Services) were really duking it out. But these
days, the survey has a look of obsolescence.
http://www.net-security.org/news.php?id=6219

OUTSOURCING FIRMS WARNED OF 'SIGNIFICANT COST OF SECURITY'
International enterprises cannot afford to ignore the potentially
serious IT security implications that arise when they decide to
outsource core business functions to third party providers, industry
analysts have warned.
http://www.net-security.org/news.php?id=6220

GAIM-ENCRYPTION: SIMPLE ENCRYPTION FOR INSTANT MESSAGES
Instant messaging is everywhere nowadays, but people who use it may
be surprised to know how trivial it is to listen in on their private
conversations.
http://www.net-security.org/news.php?id=6221

FUTURE WINDOWS COMPONENT COULD SPUR OLD-SCHOOL VIRUSES
A planned component for Longhorn is causing consternation among
antivirus experts, who say that the new module could give birth to a
whole new generation of viruses and remotely exploitable attacks.
http://www.net-security.org/news.php?id=6222

SECURE E-MAIL AND PKI: TOGETHER AT LAST?
New technology and increased regulatory pressures are breathing new
life into public key-based e-mail security.
http://www.net-security.org/news.php?id=6223

LESSONS LEARNED FROM VIRUS INFECTIONS
This article discusses how a virus outbreak will produce a few unique
opportunities to examine the health of an organization's network --
and learn ways to further harden the network from future automated
attacks.
http://www.net-security.org/news.php?id=6224

PRIVACY WATCHDOG CONDEMNS US VISIT
The United States' new biometric system of border controls violates
civil rights without delivering security, the head of the
London-based civil liberties watchdog Privacy International has
warned.
http://www.net-security.org/news.php?id=6225

NORTH KOREA'S COMPUTER HACKERS TARGET SOUTH AND US?
North Korea has trained as many as 600 computer hackers to be capable
of launching a cyber-war on South Korea, the US or Japan, South
Korea's defence ministry said on Monday.
http://www.net-security.org/news.php?id=6226

SECURITY UPGRADE AT WIFI LOCATIONS
Starting today, users of wireless broadband should find it safer to
surf the Web from a T-Mobile HotSpot.
http://www.net-security.org/news.php?id=6227

MICROSOFT TAKES AIM AT MALWARE
Gates promises a cure for malicious software.
http://www.net-security.org/news.php?id=6228

SYMANTEC ATTACKS BACKUP WITH LIVE STATE RECOVERY
In an effort to include storage within its empire of security
products, Symantec Corp. announced that it is going after the backup
market with live state recovery software products that do
point-in-time snapshots of entire servers or desktops.
http://www.net-security.org/news.php?id=6229

WHO'S EAVESDROPPING ON YOUR CELL?
If you thought that your little chit chats on your mobile phones are
safe from eavesdropping, think again, as security experts have
revealed that the new generation of mobile phones are highly
vulnerable to hackers.
http://www.net-security.org/news.php?id=6230

SCHNEIER: SECURITY OUTSOURCING WIDESPREAD BY 2010
Bruce Schneier talks about the safety of open source vs. closed
source, the future of security management and spread of blogs.
http://www.net-security.org/news.php?id=6231

SUPPLY-CHAIN SECURITY WILL TAKE MORE THAN RFID
There's no single technology available to solve supply-chain security
problems. There's too much hype around RFID technology.
http://www.net-security.org/news.php?id=6232

HOUSE PASSES BILL IMPOSING HEFTY FINES OVER 'SPYWARE'
Companies and others that secretly install "spyware" programs on
people's computers to quietly monitor their Internet activities would
face hefty federal fines under a bill the House passed Tuesday.
http://www.net-security.org/news.php?id=6233

A HISTORY OF GLOBAL HACKING
Hacking is not a new problem nor is it isolated to one country.
http://www.net-security.org/news.php?id=6234

NEW SECURITY PRODUCTS 'ADAPTING' TO THREATS
Enterprises getting proactive about security.
http://www.net-security.org/news.php?id=6235

KEYS TO A SECRET NETWORK
Seclarity's SiNic combines hardware encryption and granular policy
management to lock down private LANs.
http://www.net-security.org/news.php?id=6236

HACKING BOOKS WITH SAFARI WEB SERVICES
For the past three years, Safari Books Online has been making offline
technical books available on the Web. This article shows you how to
get more out of this resource.
http://www.net-security.org/news.php?id=6237

ADOBE DOES DOCUMENT SECURITY
Electronic document giant Adobe said that it was partnering with
digital certificate company GeoTrust to provide technology that will
allow documents that use Adobe's popular PDF to be digitally
certified.
http://www.net-security.org/news.php?id=6239

MORE MOBILITY, MORE SECURITY ISSUES
New survey by Edge Research indicates top security issues include
regulatory compliance and remote/mobile access.
http://www.net-security.org/news.php?id=6240

CA BUYS NETEGRITY IN WEB SECURITY PLAY
In a deal that could expand its identity and access management (IAM)
portfolio, Computer Associates is buying software security developer
Netegrity for $430 million in cash.
http://www.net-security.org/news.php?id=6241

NEW TROJAN PROGRAM SQUASHES ADWARE
Downloader.Lunii delete files used by common adware programs, but is
not entirely benevolent.
http://www.net-security.org/news.php?id=6242

DRIVE-BY HACKERS GET RESIDENTS' HACKLES UP
The specter of drive-by computer hackers cruising upscale Scottsdale
neighborhoods to cherry-pick wireless Web systems has residents
worried about a new method of privacy intrusionv
http://www.net-security.org/news.php?id=6243

THE FUTURE OF INFOSEC
Because software is potentially infinitely foul-able it can be said
that it is also infinitely insecure.
http://www.net-security.org/news.php?id=6244

SECURITY CONCERNS PUT MSN MESSENGER BETA ON HOLD
Microsoft has suspended the beta testing of the next version of its
MSN Messenger client because of a potential security problem.
http://www.net-security.org/news.php?id=6245

HOWARD SCHMIDT - CSO AT EBAY - RETURNS TO GOVERNMENT
Howard Schmidt, a highly regarded technology executive who was former
special adviser to President Bush for cybersecurity, is returning to
work with the Homeland Security Department on efforts to protect the
nation's computer networks.
http://www.net-security.org/news.php?id=6246

UNDERSTANDING WINDOWS SECURITY TEMPLATES
A security template contains hundreds of possible settings that can
control a single or multiple computers.
http://www.net-security.org/news.php?id=6247

NOOMY.A VIRUS SPREADING VIA CHAT ROOMS
IRC users hoodwinked with promise of software cracks and Kournikova
screensavers.
http://www.net-security.org/news.php?id=6248

CA DELIVERS VIRUS PROTECTION FOR WINDOWS XP EMBEDDED
Computer Associates announced the general availability of eTrust
Antivirus for Microsoft Windows XP Embedded - the industry's first
virus protection solution designed specifically for Microsoft's
componentised version of the Windows XP operating system.
http://www.net-security.org/news.php?id=6249

ISPS NOT FORCED TO SECRETLY COOPERATE WITH THE FBI ANYMORE
A New York judge did the right thing last week when he threw out a
USA-PATRIOT Act provision that forced ISPs to secretly cooperate with

the FBI, and gave them no obvious avenue for appeal.
http://www.net-security.org/news.php?id=6250

IMPROVE SECURITY WITH WIRELESS
Anyone who says wireless networks are insecure just isn't paying
attention.
http://www.net-security.org/news.php?id=6251

WHAT YOU SHOULD KNOW ABOUT FIREWALLS
It's 2 a.m. Do you know what your PC is doing? If not, you're
probably not running a firewall to protect your system from hackers
and malcontents.
http://www.net-security.org/news.php?id=6252

SHIFTING CYBER THREATS MENACE FACTORY FLOORS
A new report says that external attackers have overtaken insiders as
the most likely cyber threat to remote-controlled factory equipment.
http://www.net-security.org/news.php?id=6253

CRYPTO-LOOPS
A loopback device is a very special device that allows you to mount a
normal file as it was a physical device. loopbacks can be encrypted:
this becomes very useful sometimes.
http://www.net-security.org/news.php?id=6254

A SIMPLE GUIDE TO SLIPSTREAMING WINDOWS XP SP 2
Slipstreaming a Service Pack, is the process to integrate the Service
Pack into the installation so that with every new installation the
Operating System and Service Pack are installed at the same time.
http://www.net-security.org/news.php?id=6255

DESKTOP FIREWALLS BRING SECURITY CLOSER TO HOME
Not just for the perimeter anymore, a firewall for your desktop can
help block and control hostile code and intruders from entering
machines on the LAN, in remote offices or on the road. Find out why
you need one.
http://www.net-security.org/news.php?id=6256

HOW TO INSTALL A SIMPLE NETWORK GATEWAY
This HOWTO is aimed at first time Linux users who want to set up a
Linux box as a gateway to the Internet.
http://www.net-security.org/news.php?id=6257

GAPS REMAIN IN WI-FI SECURITY
Sadly the new WPA2 security spec won't make your wireless LAN
invulnerable.
http://www.net-security.org/news.php?id=6258

BILL IMPOSES PRISON TIME OVER 'SPYWARE'
The House on Thursday passed the second bill in three days that would
outlaw "spyware," irritating software that quietly monitors the
activities of Internet users.
http://www.net-security.org/news.php?id=6259

FIGHTING THE ARMY OF BYTE-EATING ZOMBIES
"Over the past six months, Symantec documented more than 4,496 new
Windows (particularly Win32) viruses and worms, over four and a half
times the number as the same period in 2003."
http://www.net-security.org/news.php?id=6260

Articles can be contributed to articles@net-security.org

BASELINING WITH SECURITY TEMPLATES
The solution to creating and implementing security baselines on
computers in your network is to "just do it." Security baselines
establish the foundation for the overall security of a computer. If a
computer has no foundation, the chances of it being compromised are
very high.

WINDOWS FORENSICS AND INCIDENT RECOVERY
The purpose of this book is to explain some technical information
about Windows systems with a focus on forensics audits and incident
recovery. The author did a good job and by the end of the book you
will know how to prepare your system to prevent and detect incidents,
how to analyze live forensics data, and more.
http://www.net-security.org/review.php?id=143

[**Software**]

Windows software is located at:
http://net-security.org/software_main.php?cat=1

Linux software is located at:
