**THE GREAT 'STANDALONE' ID CARD SWINDLE**

The Home Office pulled off quite a coup last week. It contrived to duck or ignore a series of criticisms of its ID card scheme, and announced minor changes which in some cases could actually be seen as strengthening it.

<http://www.net-security.org/news.php?id=6405>

#### SPYWARE: USERS SAY YES TO IT

Tagalong software, generally known as spyware, is an especially tricky security threat because user carelessness is nearly always to blame.

<http://www.net-security.org/news.php?id=6406>

#### COMMON SENSE ABOUT PASSWORDS

Passwords are a pain, but new thinking about passwords and some new tools make it possible to make passwords easier to manage and more effective.

<http://www.net-security.org/news.php?id=6407>

#### SIMPLER ID MANAGEMENT READIED BY MICROSOFT

Portal-like interface to be featured.

<http://www.net-security.org/news.php?id=6408>

#### THE BASICS OF DNSSEC

The DNS is one of the building blocks of the modern Internet. It's showing its age, though; it comes from a time when trust was the default. Now it's time to move to more secure approaches.

<http://www.net-security.org/news.php?id=6409>

#### CONCERNS OVER WINDOWS CASHPOINTS

Cash machine networks could soon be more susceptible to computer viruses, a security firm has warned.

<http://www.net-security.org/news.php?id=6410>

#### THE CASE FOR SECURE STRATEGIES

A comprehensive security strategy aims at leveraging the best information security practices to improve business performance.

<http://www.net-security.org/news.php?id=6411>

#### BAGLE VIRUS TAKES AIM AT MICROSOFT

While only 120 computers in Australia were hit on the weekend by the latest variant of the Bagle virus (W32/Bagle-AU-Sophos), antivirus providers are warning that it is particularly nasty.

<http://www.net-security.org/news.php?id=6412>

#### LAPTOP USERS CITED AS HIGH SECURITY THREAT

Europe-wide survey finds 'massive ignorance' over spyware.

<http://www.net-security.org/news.php?id=6413>

#### BUSINESS FRETS OVER WIRELESS SECURITY

There is no question that a number of the new mobile solutions that are being developed could help many business processes function more efficiently.

<http://www.net-security.org/news.php?id=6414>

#### AOL JOINS INDUSTRY ANTI-SPAM, ANTI-VIRUS GROUP

America Online said it has joined the Messaging Anti-Abuse Working Group, which was formed last December by a group of communications and technology companies to fight spam, viruses and other online attacks and nuisances.

<http://www.net-security.org/news.php?id=6417>

#### SECURITY AND INTEGRATION BURDEN AS400 MANAGERS

Single sign-on, security, heavy workload and constantly changing technical and business requirements are among the issues that keep members of the IBM mid-range systems user group Common UK awake at night.

<http://www.net-security.org/news.php?id=6419>

#### FIRST AUTOMATED PASSWORD ENTRY APPLICATION FOR USB DRIVES

Siber Systems announced it has shifted the power of computer password and digital identity storage/management to a truly portable, increasingly popular, and previously unexpected platform -- the USB drive.

<http://www.net-security.org/news.php?id=6420>

#### LIMIT USER FREEDOM TO IMPROVE IT SECURITY

IT departments need to lock down their users' PC configurations, Gartner research vice-president Brian Gammage has warned.

<http://www.net-security.org/news.php?id=6421>

#### PHISHING FOR SAVVY USERS

Recent "phishing" episodes are still often overlooked by tech-savvy users, but a lesson in history shows how entire nations have been fooled.

<http://www.net-security.org/news.php?id=6422>

#### ONLINE IDENTITY THEFT: MANY MEDICINES, NO CURE

Technologies emerge to address growing problems.

<http://www.net-security.org/news.php?id=6423>

#### FACE-TO-FACE FOR 20MBYTE CHIP CARD SECURITY CONTROL

Infineon claims the world's first chip card security controller using the innovative face-to-face technology, offering 1MByte of memory capacity, manufactured in a 130nm process technology.

<http://www.net-security.org/news.php?id=6424>

#### SECURITY SOFTWARE SUPPORT SEEN PASSING \$800 MILLION MARK

U.S. security software support services are expected to grow from \$551 million in 2003 to \$808 million in 2008, an IDC report released Monday says.

<http://www.net-security.org/news.php?id=6425>

#### IE EXPLOITS TOP WEB SECURITY THREAT LIST

Internet Explorer exploits posed the fastest growing web security threat to enterprises in the last quarter, according to web security services firm ScanSafe.

<http://www.net-security.org/news.php?id=6426>

#### NOKIA ADDS RFID TO LATEST HANDSETS

Near Field Communication shell system offers touch-based interactions.

<http://www.net-security.org/news.php?id=6427>

#### IE FALTERS, MOZILLA GAINS AMID SECURITY FEARS

Although Microsoft still dominates the Web browser space, Internet Explorer continues to lose market share to open-source rival Mozilla due to security concerns.

<http://www.net-security.org/news.php?id=6428>

#### SILICON BUILDS STRONGER SECURITY

There's a clear need for better PC security - and purpose-built chips could help.

<http://www.net-security.org/news.php?id=6429>

#### WLAN USERS STILL WORRIED ABOUT SECURITY

Although potential wireless network users are being deterred by concerns about network security, companies continue to adopt the technology for data and voice.

<http://www.net-security.org/news.php?id=6430>

#### REVIEW: SUSE LINUX ENTERPRISE SERVER 9

SUSE Linux Enterprise Server 9 represents a significant step forward for GUI-based enterprise server operating systems.

<http://www.net-security.org/news.php?id=6431>

#### ANTI-SPYWARE PROGRAMS CLEAN BUT DON'T DISINFECT

Though less than a year old, the PC took more than five minutes to start up and never shut down without stalling on error messages.

<http://www.net-security.org/news.php?id=6432>

#### DAYS IN THE LIFE OF A SECURITY PENETRATION TESTER

Foreign hackers, weak passwords, backdoors and buffer overflows - just another day at the office for a penetration tester. Here's a look at a typical few days' testing work at my company, and what all companies can learn from the results.

<http://www.net-security.org/news.php?id=6433>

#### NSA GIVES SECURITY GUIDANCE FOR MAC OS X

The National Security Agency has posted a 109-page document on its Web site telling agencies how to securely install and use Apple

Computer Inc.'s Mac OS X Version 10.3.x operating system, code-named Panther.

<http://www.net-security.org/news.php?id=6434>

#### WIFI SECURITY CONCERNS EASING

For corporate deployment of WiFi networks, security has been the biggest hurdle to overcome and one of WiFi's biggest cons. Today, all that has changed.

<http://www.net-security.org/news.php?id=6435>

#### ONLINE PAYMENT FIRM IN DDOS DRAMA

Online payments processing firm Protx is continuing to fight a sustained internet attack which has severely impacting its services for the fourth successive day.

<http://www.net-security.org/news.php?id=6436>

#### SSH USER IDENTITIES

This article shows how to improve SSH security using public key authentication instead of, or in addition to, password authentication.

<http://www.net-security.org/news.php?id=6437>

#### INSTALLING AND SECURING VOIP WITH LINUX

We have been using Linux for years as firewalls and we knew there had to be a low cost open source solution to fulfill the requirements, and that's when we found 'Asterisk' - a full blown Linux based PBX system meeting all the requirements of voice mail, conference calling, caller ID, call parking, music on hold, PBX to PBX dialing and much more.

<http://www.net-security.org/news.php?id=6438>

#### CISCO FIREWALL SOURCE CODE IS FOR SALE

A group describing itself as the Source Code Club (SCC) has offered to sell source code for Cisco's Pix proprietary security firewall software to any taker for \$24,000.

<http://www.net-security.org/news.php?id=6439>

#### RFID RIGHTS

The rush by Wal-Mart and other companies to put radio frequency identification devices in their goods could imperil consumer privacy.

<http://www.net-security.org/news.php?id=6440>

#### USING NETSTAT FOR SURVEILLANCE AND TROUBLESHOOTING

Keep an eye on your Linux systems.

<http://www.net-security.org/news.php?id=6441>

#### A SPYWARE MYSTERY: WHO'S BEHIND IT?

In less than two years, CoolWebSearch has become the bane of the

computing industry.

<http://www.net-security.org/news.php?id=6442>

#### TWO FOUND GUILTY IN SPAM CASE

A man and his sister, who sent unsolicited junk email to millions of America Online customers, have been convicted in the first felony prosecution of distributors of spam in the US.

<http://www.net-security.org/news.php?id=6443>

#### NETWORK SECURITY GETS PHYSICAL

When you hear about convergence, it's usually in reference to the union of voice and data networks. But the security sector is about to witness its own version of this phenomenon as more customers begin to demand ways to make their networks and physical security systems work better together.

<http://www.net-security.org/news.php?id=6444>

#### MAKING SECURE REMOTE BACKUPS WITH RSYNC

Backups are more important than ever these days, as our digital information collections expand. Many Linux users know rsync as a file transfer utility, but rsync can also be an efficient tool for automating remote backups of your Linux, Windows, and even Mac OS X systems.

<http://www.net-security.org/news.php?id=6445>

#### NEW PHISHING SCAM EVEN MORE INSIDIOUS

Fraudsters have developed a potent new computer program that steals Internet banking customers' details by duping them into opening up a bogus e-mail, a British security firm said Wednesday.

<http://www.net-security.org/news.php?id=6446>

#### STAMPING OUT SPAM

It clutters your e-mail, slows your PC, and worse - but plenty of weapons can combat spam. Here's how to choose the best one for you.

<http://www.net-security.org/news.php?id=6447>

#### SUSPECTED HACKER FACES FOUR COUNTS OF FRAUD

Former UT student allegedly stole personal information.

<http://www.net-security.org/news.php?id=6448>

#### RSA CONFERENCE EUROPE 2004 SHOWCASE VIDEO

Here's a showcase of the RSA Conference Europe 2004 in Barcelona. The video is 3:44 minutes in length, available in Windows Media 9 256K (6.9 MB) and 64K (1.7 MB).

<http://www.net-security.org/news.php?id=6449>

#### TCP/IP CHECKSUM VECTORIZATION USING ALTIVEC, PART 1

This two-part article demonstrates the kinds of performance gains

AltiVec can produce on the TCP/IP checksum, or on code similar to it.  
<http://www.net-security.org/news.php?id=6450>

#### SECURITY IMPROVEMENTS URGED TO BOOST E-COMMERCE

"There are three factors holding consumers back from using the Internet for e-commerce: it's scary, it's hard to use, and it is confusing and chaotic." RSA Security chief executive Arthur Coviello said.

<http://www.net-security.org/news.php?id=6451>

#### ADVANCED FEATURES OF NETFILTER/IPTABLES

Iptables has many hidden gems that can allow you do things with your firewall that you might never have even imagined.

<http://www.net-security.org/news.php?id=6452>

#### MICROSOFT ENDS EXCLUSIVE PATCH PEEKS

Microsoft plans to open up who gets a sneak peek at its security bulletins.

<http://www.net-security.org/news.php?id=6453>

#### PHISHERS ADOPT SCAM TRICKS FROM VIRUS WRITERS

Dangerous new ways to try to steal your money are in progress.

<http://www.net-security.org/news.php?id=6454>

#### GOOD SAMARITAN BREAKS UP ID GANG

A good Samaritan who handed a lost CD wallet into his local police station helped cyber plods crack what they are calling Australia's largest identity fraud ring.

<http://www.net-security.org/news.php?id=6455>

#### SECURE WINDOWS SERVER 2003 ACTIVE DIRECTORY

Make Active Directory more secure under Windows Server 2003.

<http://www.net-security.org/news.php?id=6456>

### BASTILLE LINUX 2.1.5 (Linux)

The Bastille Hardening System attempts to "harden" or "tighten" the Linux operating system.

<http://www.net-security.org/software.php?id=217>

### BOTAN 1.4.2 (Linux)

Botan aims to be a portable, easy to use, and efficient C++ crypto library.

<http://www.net-security.org/software.php?id=94>

### CRIPPIN 2.3 (Pocket PC)

Crippin was designed to protect confidential files in case a Pocket PC is lost or stolen.

<http://www.net-security.org/software.php?id=544>

### DAZUKO 2.0.4 (Linux)

A common interface across all platforms is needed for 3rd party file access control. With such an interface, focus could be redirected from OS hacking to solving real problems. The interface is here.

<http://www.net-security.org/software.php?id=434>

### FIREHOL R5 1.214 (Linux)

FireHOL is a Linux iptables firewall generator.

<http://www.net-security.org/software.php?id=307>

### JSCH 0.1.18 (Windows)

JSch is a pure Java implementation of SSH2.

<http://www.net-security.org/software.php?id=417>

### MAILSCANNER 4.35.9 (Linux)

MailScanner is a virus scanner for e-mail designed for use on e-mail gateways.

<http://www.net-security.org/software.php?id=144>

MIMEDEFANG 2.48 (Linux)

MIMEDefang is a flexible MIME email scanner designed to protect Windows clients from viruses.

<http://www.net-security.org/software.php?id=214>

NESSUS 2.2.0 (Linux)

Nessus is a free, powerful, up-to-date and easy to use remote security scanner.

<http://www.net-security.org/software.php?id=19>

SAMHAIN 2.0.1 (Linux)

Samhain is an open source file integrity and host-based intrusion detection system.

<http://www.net-security.org/software.php?id=125>

SSL-EXPLORER 0.1.4 (Windows)

The 3SP SSL-Explorer is the world's first open-source SSL-based VPN solution of its kind.

<http://www.net-security.org/software.php?id=579>

THE SLEUTH KIT 1.73 (Linux)

The Sleuth Kit is a collection of UNIX-based command line file system forensic tools.

<http://www.net-security.org/software.php?id=215>

WINSCP 3.7.1 (Windows)

WinSCP is an open source SSH file transfer protocol and secure copy client for Windows using SSH.
